

This meeting is a continuation of the CASAC Lead Review Panel's peer review of the current draft Lead AQCD. The Lead Panel met in a public meeting on February 28 and March 1, 2006 to conduct its initial peer review of the first draft Lead AQCD. The report from that meeting, dated April 26, 2006, is posted on the SAB Web site at: <http://www.epa.gov/sab/pdf/casac-06-005.pdf>.

In addition, in conjunction with its preparation of the Lead Staff Paper, EPA's Office of Air Quality Planning and Standards (OAQPS), within the Office of Air and Radiation (OAR), on May 31, 2006 released a draft *Analysis Plan for Human Health and Ecological Risk Assessment for the Review of the Lead National Ambient Air Quality Standards*. The purpose of this analysis plan is to outline the scope, approaches, and methods that Agency staff are planning to use for the human health and ecological risk assessments for lead. This plan also highlights key issues in the estimation of human health and ecological exposure and risks posed by lead under existing air quality levels ("as is" exposures and health risks). Furthermore, this analysis plan is intended to facilitate consultation with the CASAC, as well as public review, for the purpose of obtaining advice on the overall scope, approaches, and key issues in advance of the completion of such analyses and presentation of results in the first draft Lead Staff Paper.

Technical Contact: Any questions concerning the second draft Lead AQCD should be directed to Dr. Lori White, NCEA-RTP, at phone: (919) 541-3146, or e-mail: white.lori@epa.gov. General information concerning the CASAC or the EPA Science Advisory Board can be found on the EPA Web site at: <http://www.epa.gov/sab>.

SUPPLEMENTARY INFORMATION:

Background: The CASAC, which is comprised of seven members appointed by the EPA Administrator, was established under section 109(d)(2) of the Clean Air Act (CAA) (42 U.S.C. 7409) as an independent scientific advisory committee, in part to provide advice, information and recommendations on the scientific and technical aspects of issues related to air quality criteria and NAAQS under sections 108 and 109 of the Act. The CASAC is a Federal advisory committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App.

On December 15, 2005, the EPA Deputy Administrator initiated a review of the process that the Agency uses to periodically review and revise, as appropriate, the air quality criteria and NAAQS for the six criteria air pollutants, pursuant to section 109(d)(1) of the CAA. In response to the Agency's request, on February 17, 2006 the SAB Staff Office Director solicited individual input from current and former CASAC members into this review of the NAAQS review process. These individual responses, which were compiled by the SAB Staff Office and provided to the Agency from March 16 to March 29, 2006, are available on the SAB Web site at URL: http://www.epa.gov/sab/panels/epa_rev_naaqs_rev_proc.htm. On April 3, 2006, EPA made publicly-available a

March 2006 report of the Agency's NAAQS Process Review Workgroup, along with the recommendations of EPA's Office of Research and Development (ORD) and Office of Air and Radiation (OAR).

In response to the Agency's request, the CASAC is holding the public meeting to provide its input for EPA's recommended changes to the NAAQS review process. To facilitate the discussion at this June 29 meeting, on May 12, 2006 the CASAC provided the Administrator with its preliminary thoughts on the recommended changes to the NAAQS review process. The CASAC's May 12, 2006 letter to the Administrator is also posted on the SAB Web site at the above URL.

Other background and meeting-related materials, including discussion questions for the CASAC, will be posted prior to this meeting at URL: http://www.epa.gov/sab/panels/epa_rev_naaqs_rev_proc.htm.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of draft NPDES general permit.

SUMMARY: The Director, Office of Water and Watersheds, EPA Region 10, is proposing to issue a general National Pollutant Discharge Elimination System (NPDES) permit for groundwater remediation discharge facilities in Idaho, pursuant to the provisions of the Clean Water Act, 33 U.S.C. 1251 *et seq.* The draft general permit authorizes the discharge of treated groundwater from new and existing facilities to surface waters of the United States within the State of Idaho. Interested persons may submit comments on the proposed general permit to EPA Region 10 at the address below.

DATES: Comments must be received or postmarked by August 14, 2006. A fact sheet has been prepared which sets forth the principal factual, legal, policy, and scientific information considered in the development of the draft general permit.

The draft general permit contains a variety of technology-based and water quality-based effluent limitations for 55 pollutants of concern commonly found in contaminated groundwater, along with administrative and monitoring requirements, as well as other standard conditions, prohibitions, and management practices. Effluent limits are applied at end-of-pipe with no mixing zone. However, mixing zones are available on an individual basis at the discretion of the Idaho Department of Environmental Quality (IDEQ) for pollutants with water quality-based effluent limits. Mixing zones will be granted through an individual State certification that will be attached to EPA's authorization to discharge letter.

Public Comment: Interested persons may submit written comments on the draft general NPDES permit to the attention of Robert Rau at the address below. Copies of the draft general

permit and fact sheet are available upon request. The general permit and fact sheet may also be downloaded from the Region 10 Web site at <http://www.epa.gov/r10earth/waterpermits.htm> (click on draft permits, then Idaho). All comments should include the name, address, and telephone number of the commenter and a concise statement of comment and the relevant facts upon which it is based. Comments of either support or concern which are directed at specific, cited permit requirements are appreciated.
