Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, an agreement to a proposed consent order from respondent FanBuzz, Inc.

The proposed consent order has been placed on the public record for thirty (30) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After thirty (30) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement and take other appropriate action or make final the agreement's proposed order.

This matter concerns practices related to the sale of textile products by means of an Internet catalog. The Commission's complain charges that respondent violated the Federal Trade Commission Act, 15 U.S.C. 41 *et seq.*, and the Textile Fiber Products Identification Act, 15 U.S.C. 70 *et seq.*,

by failing to disclose in its Internet catalog whether products offered for sale were made in the United States, imported, or both.

Part I of the proposed consent order prohibits future violations of the Textile Fiber Products Identification Act and Commission rules and regulations, found at 16 CFR Part 303, implementing the requirements of the statute.

Part II of the proposed order requires the respondent, for five years after the date of issuance of the Order, to maintain records demonstrating compliance with the Order, including: (a) Copies of mail order catalogs and mail order promotional materials, as defined in 16 CFR 303.1(u), that offer textile products for direct sale to consumers; and (b) complaints and other communications with consumers, government agencies, or consumer protection organizations, pertaining to country-of-origin disclosures for textile products.

Part III of the proposed order requires the respondent to distribute copies of the order to certain company officials and employees. Part IV of the proposed order requires the respondent to notify the Commission of any change in the corporation that may affect compliance obligations under the order. Part V of the proposed order requires the respondent to file one or more compliance reports. Part VI of the proposed order is a provision whereby the order, absent certain circumstances, terminates twenty years from the date of issuance.

The purpose of this analysis is to facilitate public comments on the proposed consent order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

By direction of the Commission.

Donald S. Clark,

Secretary.

Proposed Project

Pulmonary Function Testing Course Approval Program, 29 CFR 1910.1043 (OMB No. 0920-0138)—EXTENSION—The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC). The mission of the National Institute for Occupational Safety and Health is to promote safety and health at work for all people through research and prevention.

NIOSH has responsibility under the Cotton Dust Standard, 29 CFR 1910.1043, for approving courses to train technicians to perform pulmonary function testing in the Cotton Dust Industry. Successful completion of a NIOSH-approved course is mandatory under the Standard. To carry out its responsibility, NIOSH maintains a Pulmonary Function Testing Course Approval Program. The program consists of an application submitted by potential sponsors who seek NIOSH approval to conduct courses, and if approved, notification to NIOSH of any course or faculty changes during the period of approval. The application form and addend materials, including agenda, vitae and course materials, is reviewed by the National Institute for Occupational Safety and Health to determine if the applicant has developed a program which adheres to the criteria required in the Standard. Following approval, any subsequent changes to the course are submitted by course sponsors via letter and reviewed by NIOSH staff to assure that changes in faculty or course content continue to meet course requirements. Applications and materials to be a course sponsor and carry out training are submitted voluntarily by institutions and organizations from throughout the country. This is required for NIOSH to evaluate a course to determine whether it meets the criteria in the Standard and whether technicians will be adequately trained as mandated under the Standard. The estimated annual burden hours for this data collection is 66 hours.
