

proposer would use to achieve these innovations. This information will be considered against evaluation criteria 1 through 3 below.

(2) The proposal may include any other information that the proposer thinks will assist reviewers in their evaluation of the proposal against the evaluation criteria described below.

To the extent permitted by law, including the Freedom of Information Act (FOIA), 5 U.S.C. 552, NTIS will not disclose confidential or proprietary information provided and clearly marked in any proposal submitted in response to this notice without providing the organization that submitted such information the opportunity to object to the potential release of the information. If NTIS receives a request for disclosure of confidential or proprietary information, it will promptly notify the submitting organization in writing and give it an opportunity to demonstrate that NTIS should withhold the information in accordance with Department of Commerce FOIA regulations (15 CFR part 4).

Evaluation Criteria

The evaluation criteria for the proposals are as follows:

(1) Rationality (0–35 Points)

The extent to which the logic and soundness of the proposer's approach to enable data innovations that will address Federal data priorities by (a) advancing the use of data as a strategic asset to achieve mission outcome and support evidence-based policies; (b) transforming and optimizing supply chains through the use of data science capabilities; (c) promoting data governance and standardization; and (d) creating new capabilities for data discovery, data set search, and interoperability to connect and derive new insights for predictive analytics and prescriptive actions.

(2) Technical Merit of Contribution (0–30 Points)

The technical effectiveness and innovation of the proposed capabilities and past work or plans for providing such capabilities described in the proposal and the extent to which they would contribute to the fields of data science, AI, engineering, or best practices relevant to the services to be provided by NTIS and its JVPs as described in the General Scope section of this announcement.

(3) Organizational Qualifications and Resource Availability (0–35 Points)

The likelihood that the professional accomplishments, data services and solution integration delivery experience, skills, certifications, and training of the personnel proposed to provide the technical capabilities and perform the work proposed in the proposal, including all individuals whose innovative technical capabilities are critical to the development or execution of joint venture projects in a substantive and measurable way as identified in the proposal, will contribute to the successful execution of projects; and the extent to which the proposer has access to the necessary equipment, tools, facilities, technologies, and overall support and resources to accomplish proposed objectives and work jointly with NTIS to accomplish project goals.

Evaluation and Selection Process

All proposals received before the end date set forth in the **DATES** section of this notice will be reviewed to determine whether they are submitted by a private-sector organization (eligible), contain all required technical, business and administrative information (complete), and are responsive to this notice. Proposals determined to be ineligible, incomplete, and/or non-responsive based on the initial screening will be eliminated from further review. However, NTIS, in its sole discretion, may continue the review process for a proposal that is missing non-substantive information that can easily be rectified or cured.

All proposals that are determined to be eligible, complete, and responsive will proceed for full reviews in accordance with the review and selection process set forth below.

At least three (3) objective individuals, knowledgeable about the particular technical areas described in the proposal, will review the merits of each proposal based on the evaluation criteria. The reviewers may discuss the proposals with each other, but scores will be determined on an individual basis, not as a consensus. NTIS may solicit oral presentations from some or all proposers.

The Selecting Official, who is the NTIS Deputy Director or designee, will make final proposal selections, taking into consideration the results of the reviewers' evaluations, relevance to the scope and objectives described in this notice, the distribution of proposals across technical areas, and the distribution of proposers among a diverse set of qualified organizations. A diverse set of qualified organizations

would include large, medium, and small organizations that may be for-profit or non-profit and that have both unique and discrete data science capabilities and specialized expertise and experience in integrating such capabilities for holistic, complete solutions.

Notification of Results

Unsuccessful proposers will be notified in writing. Proposers whose proposals are selected will be notified and will be provided with a standard NTIS joint venture partnership agreement for execution. Each joint venture partnership agreement entered into between a selected proposer and NTIS will incorporate the selected proposer's proposal by reference. NTIS will not be responsible for any costs incurred by any proposer prior to execution of a joint venture partnership agreement.

Gregory Capella,

Deputy Director, National Technical Information Service.
