IV. Summary of Public Comments Received and Agency Response to Comments

In the **Federal Register** of May 9, 2014 (79 FR 26754) (FRL–9909–95), EPA announced and sought public comment on requests from the registrants to voluntarily amend their registrations to terminate uses of the products as listed in Table 1 of Unit III. In the May 9, 2014 notice, EPA indicated that it would issue an order implementing the requested amendments to terminate uses, unless the Agency received substantive comments within the 30-day comment period that would merit its further review of these requests, or unless the registrants withdrew their requests. The Agency did not receive any comments concerning that notice; nor did the registrants subsequently withdraw their requests.

V. EPA's Order

Pursuant to FIFRA section 6(f), EPA hereby approves the requested amendments to terminate uses of iprodione, pendimethalin, and permethrin registrations as identified in Table 1 of Unit III. Accordingly, the Agency hereby orders that the product registrations identified in Table 1 of Unit III., are amended to terminate the uses as identified in Table 1 of Unit III. The effective date of the amendments that are subject to this order is August 13, 2014. Any distribution, sale, or use of existing stocks of the products identified in Table 1 of Unit III., in a manner inconsistent with any of the provisions for disposition of existing stocks set forth in Unit VI. will be a violation of FIFRA.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the action. The existing stocks provision for the products subject to this order is as follows.

Now that EPA has approved product labels reflecting the requested amendments to terminate uses, registrants are permitted to sell or distribute products listed in Table 1 of Unit III., under the previously approved labeling until February 15, 2016, a period of 18 months after publication of this order in the **Federal Register**, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in Table 1 of Unit III., except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the products with terminated uses.

Permit No. 17364 was issued March 14, 2013 (78 FR 17640) with the Permit Holder's objectives stated as to refine propagation and culture techniques of captive Atlantic sturgeon held in refugia at the USFWS's Northeast Fisheries Center, providing a source of research animals for studies related to tagging, tracking, behavior, physiology, genetics, health, cryopreservation, and other methods for population conservation, recovery, or enhancement of the species in the wild.

The Permit Holder now proposes including five captive holding facilities of Atlantic sturgeon located in the state of Maryland, as well as co-investigators, to conduct similar scientific research on life stages of captive Atlantic sturgeon.

Study objectives would include nutrition, physiology, propagation, contaminants, genetics, fish health, cryopreservation, tagging, and refugia. Additionally, studies would examine abiotic factors (e.g., pH, temperature, salinity dissolved oxygen, etc) influencing distribution and abundance in the wild. The modifications would be valid until expiration of the permit on March 13, 2018.

Dated: August 7, 2014.

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
