### SUPPLEMENTARY INFORMATION:

### I. Introduction

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The NRC typically seeks public comment on a draft version of a regulatory guide by announcing its availability for comment in the Federal Register. However, the NRC may directly issue a final regulatory guide without a draft version or public comment period if the changes to the regulatory guide are non-substantive, including changes to the Regulatory Position section of the regulatory guide. Issuance of regulatory guides using this direct final process reduces processing time and review costs. A regulatory guide revised using this process is called an Administratively Changed Guide (ACG).

Revision 2 of RG 5.66 is being issued directly as a final regulatory guide because the changes between Revision 2 and Revision 1 are non-substantive. Regulatory Guide (RG) 5.66 was written to provide guidance to licensees for the access authorization programs required by Title 10 of the Code of Federal Regulations (10 CFR), section 73.56, "Personnel Access Authorization Requirements for Nuclear Power Plants," and 10 CFR part 26, "Fitness for Duty Programs." The RG was
