### Federal Railroad Administration

[Docket Number FRA-2005-21014]

#### Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on October 1, 2020, Maine Narrow Gauge Railroad Company and Museum (MNGR) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 230, Steam Locomotive Inspection and Maintenance Standards. FRA assigned the petition Docket Number FRA-2005-21014.

Specifically, MNGR, a 2-foot gage tourist and museum railroad, seeks a renewal of a waiver of compliance from the requirements of 49 CFR 230.51, *Water glasses and gage cocks, number and location*. MNGR operates two steam locomotives, No. 3 and No. 4, built in 1913 and 1918, respectively, by Vulcan Iron Works. The locomotives pull tourist trains on approximately two miles of track located within the waterfront district of Portland, Maine. MNGR specifically requests that the minimum reading for the water glasses on these two locomotives be retained at inches above the highest part of the

crown sheet as originally designed, constructed, and operated since the early 1900s. Modifying the locomotives to comply with the regulatory requirement of a minimum water reading of 3 inches would result in the top or full reading of the water glasses being of equal height with the top of the boiler. Thus, when the water glass indicates full, there is very little remaining volume for steam to accumulate, and water may carry over into the dry pipe, creating an unsafe condition. In addition, the boilers on these two locomotives are 37-1/8 inches in diameter, which is significantly smaller than that found on standard gage locomotives. MNGR states that due to the difference in boiler diameters, an equivalent level of safety exists.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at [www.regulations.gov](http://www.regulations.gov).

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Website:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation (DOT), 1200 New Jersey Ave. SE, W12-140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Ave. SE, Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by December 21, 2020 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its

processes. ### Maritime Administration

[Docket No. MARAD-2020-0127]

#### Deepwater Port License Application: Blue Marlin Offshore Port, LLC (BMOP)

**AGENCY:** Maritime Administration, Department of Transportation.

**ACTION:** Notice of intent; Notice of virtual public meeting; Request for comments.

**SUMMARY:** The U.S. Coast Guard (USCG), in coordination with the Maritime Administration (MARAD), will prepare an environmental impact statement (EIS) as part of the environmental review of the Blue Marlin Offshore Port, LLC (BMOP) Deepwater port license application. The application proposes the ownership, construction, operation and eventual decommissioning of an offshore oil export deepwater port that would be located within and adjacent to the Outer Continental Shelf (OCS) in West Cameron Lease Blocks (WC) 509 and 508 and East Cameron (EC) Block 263. Following the existing Stingray pipeline, the deepwater port will be approximately 99 statute miles off the coast of Cameron Parish, Louisiana, with an approximate water depth of 162 feet. The deepwater port would allow for the loading of Very Large Crude Carriers (VLCCs) and other sized crude oil cargo carriers via a Catenary Anchor Leg Mooring (CALM). This Notice of Intent (NOI) requests public participation in the scoping process, provides information on how to participate, and announces an informational (virtual) open house and two public meetings for the communities of Cameron Parish, Louisiana and Jefferson and Orange County, Texas. Pursuant to the criteria provided in the Deepwater Port Act of 1974 (the Act), Louisiana and Texas are
