*Description:* In accordance with Section 413(i) of the Social Security Act and 45 CFR part 284, the Department of Health and Human Services (HHS) intends to reinstate the following information collection requirements. For instances when Census Bureau data show that a State's child poverty rate increased by 5 percent or more from one year to the next, a State may submit independent estimates of its child poverty rate. If HHS determines that the State's independent estimates are not more reliable than the Census Bureau estimates, HHS will require the State to submit an assessment of the impact of the TANF program(s) in the State on the child poverty rate. If HHS determines from the assessment and other information that the child poverty rate in the State increased as a result of the TANF program(s) in the State, HHS will then require the State to submit a corrective action plan.

*Respondents:* The respondents are the 50 States and District of Columbia; when reliable Census Bureau data become available for the Territories, additional respondents might include Guam, Puerto Rico and the Virgin Islands.
