

and independent commercial importers into the United States of light duty vehicles, light duty trucks and highway motorcycles.

Title: Motor Vehicle Emissions and Fuel Economy Compliance: Light Duty Vehicles, Light Duty Trucks, and Highway Motorcycles.

ICR numbers: EPA ICR No. 0783.54, OMB Control No. 2060-0104.

ICR status: This ICR is currently scheduled to expire on November 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Under the Clean Air Act (42 U.S.C. 7521 *et seq.*) manufacturers and importers of light duty vehicles (passenger cars), light trucks, and motorcycles must have a certificate of conformity issued by EPA covering any vehicle they intend to offer for sale. In addition, light duty vehicles and light truck manufacturers and importers must also submit fuel economy information and reports required by the Energy Policy and Conservation Act (49 U.S.C. 32901 *et seq.*). EPA reviews vehicle information and manufacturer test data to determine if the vehicle design conforms to applicable requirements and to verify that the required testing has been performed. After a certificate of conformity has been issued, subsequent audit and enforcement actions may be taken based on the initial information submitted as well as on information submitted while the vehicles are in service. Until a vehicle is available for purchase, information is confidential. Some proprietary information is permanently confidential.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 346.24 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying

information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 173.

Frequency of response: Yearly and occasionally.

Estimated total average number of responses for each respondent: 10.82.

Estimated total annual burden hours: 647,100.

Estimated total annual costs: \$58,343,913. This includes an estimated labor burden cost of \$39,876,745 and an estimated cost of \$18,467,168 for capital investment or maintenance and operational costs.

What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8567-7]

EPA's 2008 Report on the Environment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability.

SUMMARY: EPA is announcing the availability of a final report titled, "EPA's 2008 Report on the

Environment" (EPA/600/R-07/045F), which was prepared by the National Center for Environmental Assessment (NCEA) within EPA's Office of Research and Development (ORD) with significant input from partners across EPA and other federal agencies.

EPA's 2008 Report on the Environment (2008 EPA ROE) compiles the most reliable indicators available to help understand important trends in the environment and human health. The indicators are supported by data that are as current as possible (data included in the 2008 EPA ROE are as recent as October 2007). Additionally, the report identifies key limitations of these indicators and gaps where reliable indicators do not yet exist. These gaps and limitations highlight the disparity between the current state of knowledge and the goal of full, reliable, and insightful representation of environmental conditions and trends, and provide direction for future research and monitoring efforts.

DATES: This document will be available on or about May 20, 2008.

ADDRESSES: The document will be available electronically through the NCEA Web site at <http://www.epa.gov/ncea>. The main distribution method for this report will be via the Internet. A limited number of paper copies and compact disks, however, will be available from the EPA's National Service Center for Environmental Publications (NSCEP), P.O. Box 42419, Cincinnati, OH 45242; telephone: 1-800-490-9198; facsimile: 301-604-3408; e-mail: nscep@bps-lmit.com. Please provide your name, your mailing address, and the title and EPA number of the requested publication.

FOR FURTHER INFORMATION CONTACT: The Information Management Team, National Center for Environmental Assessment (8601P), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460. Telephone: 703-347-8561; fax: 703-347-8691; e-mail: nceadc.comment@epa.gov.

SUPPLEMENTARY INFORMATION:

To accomplish its mission to protect human health and the environment, the U.S. Environmental Protection Agency (EPA) must pay close attention to trends in the condition of the nation's air, water, and land, as well as related trends in human health and ecological systems. To meet this need, EPA embarked on a bold initiative in 2001 to assemble, for the first time, the most reliable available indicators of national environmental and health conditions and trends that are important to EPA's mission. EPA initially presented these

indicators in its *Draft Report on the Environment (ROE) Technical Document (TD)*, and its publicly oriented companion document, the *Draft Report on the Environment (ROE)*, both released in 2003. For the 2008 EPA ROE, both the proposed indicators included in the report and the complete draft document were subjected to rigorous, independent, and external peer review, as well as public comment. Complete documentation of the peer review process and responses are available at <http://www.epa.gov/ncea.roe>. Thus, EPA has revised, updated, and refined the 2003 draft ROE in response to scientific developments, as well as feedback from EPA's Science Advisory Board and stakeholders. As a result, the 2008 EPA ROE provides both an update and an improvement over the 2003 draft edition.

EPA is also producing a *Highlights of Conditions and Trends* document, which summarizes the findings of the 2008 EPA ROE in an easier-to-understand format. The Highlights Document is expected to be publicly available later in the year.

EPA is committed to releasing periodic updates of the ROE so that information on environmental conditions and trends can be provided to interested members of the public.

Assistant Administrator, Office of Research and Development.
