BILLING CODE 5001-06-M

DEPARTMENT OF ENERGY

[Docket No. PP-89-1]

Record of Decision and Floodplain Statement of Findings; Bangor Hydro-Electric Company Northeast Reliability Interconnect

AGENCY: Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy (DOE).

ACTION: Record of Decision (ROD) and Floodplain Statement of Findings.

SUMMARY: DOE announces its decision to implement the Proposed Action alternative, identified as DOE's preferred alternative in the *Final Environmental Impact Statement for the Bangor Hydro-Electric Company Northeast Reliability Interconnect* (DOE/EIS-0372). This alternative is to amend Presidential Permit PP-89 to authorize Bangor Hydro-Electric Company (BHE) to construct, operate, maintain, and connect a single-circuit, 345,000-volt (345-kV) electric transmission line that would originate at BHE's existing Orrington Substation, near Orrington, Maine, extend eastward approximately 85 miles, cross the United States (U.S.)-Canada border near Baileyville, Maine, and continue into New Brunswick, Canada. The proposed transmission line, referred to as the Northeast Reliability Interconnect (NRI), would be constructed along a route identified as the Modified Consolidated Corridors Route in the EIS.

In reaching this decision, DOE considered the low environmental impacts in the U.S. from constructing, operating, and maintaining the NRI, the lack of adverse impacts to the reliability of the U.S. electric power supply system, and the lack of major issues of concern to the public.

This ROD and Floodplain Statement of Findings have been prepared in accordance with the regulations of the Council on Environmental Quality (40 CFR Parts 1500-1508) for implementing the National Environmental Policy Act (NEPA), DOE's NEPA Implementing Procedures (10 CFR Part 1021), and DOE's Compliance with Floodplain and Wetland Environmental Review Requirements (10 CFR part 1022).

ADDRESSES: The Final EIS is available on the DOE NEPA Web site at <http://www.eh.doe.gov/nepa/documents.html> and on the project Web site at <http://web.ead.anl.gov/interconnecteis>, and the ROD will be available on both Web sites in the near future. Copies of the Final EIS and this ROD may be requested by contacting Dr. Jerry Pell at the Office of Electricity Delivery and

Energy Reliability, U.S. Department of Energy, OE-20, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, by telephone at 202-586-3362, by facsimile at 202-318-7761, or by electronic mail at Jerry.Pell@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT: For further information on the Bangor Hydro-Electric Company Northeast Reliability Interconnect EIS, contact Dr. Jerry Pell as indicated in the **ADDRESSES** section above. For general information on the DOE NEPA process, contact Carol Borgstrom, Director, Office of NEPA Policy and Compliance, EH-42, at U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585, by telephone at 202-586-4600, or leave a message at 800-472-2756.

SUPPLEMENTARY INFORMATION: The U.S. Department of the Interior's U.S Fish and Wildlife Service (Service) and the U.S. Department of Commerce's National Oceanic and Atmospheric Administration's National Marine Fisheries Service were cooperating agencies in the preparation of the EIS. Under Section 7 of the Endangered Species Act, DOE has completed consultation with the USFWS regarding impacts on Federally-listed threatened or endangered species in the area of the proposed project.

Background

Executive Order (E.O.) 10485 (September 9, 1953), as amended by E.O. 12038 (February 7, 1978), requires that a Presidential permit be issued by DOE before electric transmission facilities may be constructed, operated, maintained, or connected at the U.S. international border. DOE may issue or amend a permit if it determines that the permit is in the public interest and after obtaining favorable recommendations from the U.S. Departments of State and Defense. In determining whether issuance of a permit for a proposed action is in the public interest, DOE considers the environmental impacts of the proposed project pursuant to NEPA, the project's impact on electric reliability by ascertaining whether the proposed project would adversely affect the operation of the U.S. electric power supply system under normal and contingency conditions, and any other factors that DOE may consider relevant to the public interest.

On December 16, 1988, BHE applied to DOE for a Presidential permit to construct, operate, maintain, and connect a single-circuit, alternating current (AC) 345-kV electric transmission line that would originate at
