*General Description of Collection:* The Interagency Bank Merger Act Application form is used by the FDIC, the Board of Governors of the Federal Reserve System, and the Office of the Comptroller of the Currency for applications under section 18(c) of the Federal Deposit Insurance Act (FDIA), as amended (12 U.S.C. 1828(c)). The application is used for a merger, consolidation, or other combining transaction between nonaffiliated parties as well as to effect a corporate reorganization between affiliated parties (affiliate transaction). An affiliate transaction refers to a merger

transaction or other business combination (including a purchase and assumption) between institutions that are commonly controlled (for example, between a depository institution and an affiliated interim institution). There are different levels of burden for nonaffiliate and affiliate transactions. Applicants proposing affiliate transactions are required to provide less information than applicants involved in the merger of two unaffiliated entities. If depository institutions are not controlled by the same holding company, the merger transaction is considered a non-affiliate transaction.

There is no change in the methodology or substance of this information collection. The reduction in estimated annual burden (from 2,313 hours in 2021 to 1,751 hours currently) is due to the decline in the historical number of Reports received by the FDIC, which is the basis for the estimated number of annual responses.

2. *Title:* Foreign Banks.

*Affected Public:* Insured branches of foreign banks.

*General Description of Collection:* The LCR rule implements a quantitative liquidity requirement and contains requirements subject to the PRA. The requirement is designed to promote the short-term resilience of the liquidity risk profile of large and internationally active banking organizations, thereby improving the banking sector’s ability to absorb shocks arising from financial and economic stress, and to further improve the measurement and management of liquidity risk. The LCR rule establishes a quantitative minimum liquidity coverage ratio that requires a company subject to the rule to maintain an amount of high-quality liquid assets (the numerator of the ratio) that is no less than 100 percent of its total net cash outflows over a prospective 30 calendar day period (the denominator of the ratio). There is no change in the methodology or substance of this information collection. This reduction in estimated annual burden (from 994 hours in 2021 to 124 hours currently) is due the reduction in both the estimated number of annual respondents and the estimated time per response.
