n. The existing project works consists of the following two developments:

The existing Badger Development utilizes the head created by the 22-foothigh Army Corps of Engineers (Corps) Kaukauna dam and consists of: (1) A 2,100-foot-long, 100-foot-wide power canal that bifurcates into a 260-footlong, 200-foot-wide canal and a 250foot-long, 80-foot-wide canal leading to; (2) the Old Badger powerhouse containing two 1,000-kilowatt (kW) generating units for a total installed capacity of 2,000 kW; and (3) the New Badger powerhouse containing two 1,800-kilowatt (kW) generating units for a total installed capacity of 3,600 kW; and (4) appurtenant facilities.

The existing Rapide Croche
Development utilizes the head created
by the 20-foot-high Corps Rapide Croche
dam, located approximately 4.5 miles
downstream from the Badger
Development and consists of: (1) A
powerhouse, located on the south end of
the dam, containing four 600-kW
generating units for a total installed
capacity of 2,400 kW; (2) the 5-milelong, 12-kV transmission line; and (3)
appurtenant facilities.

The proposed project would include decommissioning the Old Badger and New Badger plants and constructing a new 7-MW powerhouse about 150 feet upstream from the existing New Badger plant site. Proposed project works would consist of: (1) A modified power canal leading to; (2) a new powerhouse with integral intake; and (3) two identical 3.5-to 3.6-MW horizontal Kaplan "S" type turbines. The Old Badger development would be converted to an alternative use. The New Badger development would be decommissioned, demolished, and removed. The existing service road would be demolished and removed. The tailrace area associated with the existing Old Badger development would be filled with soil. A new service road would be constructed over the filled area. No significant changes are proposed for the Rapide Croche development.

The existing Badger and Rapide Croche developments currently operate in run-of-river mode and as proposed, the new project would continue to operate in a run-of-river mode.
