SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

In response to the American Fisheries Act (AFA), NMFS developed a management program for Bering Sea and Aleutian Islands Management Area (BSAI) pollock to include a set of AFA permanent permits for AFA catcher/processors, AFA catcher vessels, AFA inshore processors, and AFA motherships. All vessels and processors participating in the non-Community Development Quota (CDQ) BSAI pollock fishery are required to have valid AFA permits on board the vessel or on site at the processing plant.

With the exceptions of the inshore vessel cooperatives, replacement vessel, and inshore vessel contract fishing applications, the AFA permit program had a one-time application deadline of December 1, 2000. All permitted participants in the AFA pollock fishery are already established and are issued with an indefinite expiration date.

This information collection was previously revised to include a new program, the Chinook Salmon Prohibited Species Catch Program (Chinook PSC Program). The Chinook PSC Program was established to promote reduction of Chinook salmon PSC in the Bering Sea pollock fishery to the extent practicable while achieving optimum yield in the pollock fishery. A PSC limit of Chinook salmon was established for the pollock industry participants in an industry-developed contractual arrangement, called an incentive plan agreement (IPA) that establishes an incentive program to

minimize bycatch at all levels of Chinook salmon abundance. NMFS issues transferable Chinook salmon PSC allocations to eligible entities representing the catcher/processor sector, the mothership sector, inshore cooperatives, and Community Development Quota (CDQ) groups. Transferable allocations provide the pollock fleet the flexibility to maximize the harvest of pollock while maintaining Chinook salmon bycatch at or below the PSC limit.

It is also proposed that the title of this collection will be changed from American Fisheries Act: Vessel and Processor Permit Applications to American Fisheries Act (AFA): Permits.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include online data entry, email of electronic forms, and mail and facsimile transmission of paper forms.

ACTION: Issuance of permit.

SUMMARY: Notice is hereby given that George Burgess, Ph.D., Florida Museum of Natural History, Dickinson Hall, University of Gainesville, Gainesville, FL 32611, has been issued a permit to take smalltooth sawfish (*Pristis pectinata*) for purposes of scientific research.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376; and

FOR FURTHER INFORMATION CONTACT: Colette Cairns or Jennifer Skidmore, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On September 24, 2012, notice was published in the **Federal Register** (77 FR 58812) that a request for a scientific research permit to take smalltooth sawfish had been submitted by the above-named individual. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The permit holder is authorized to gather life history information on smalltooth sawfish populations of Florida, primarily in Florida Bay and the upper Keys area. The purpose of the research is to investigate the movements and habitat use of smalltooth sawfish in Florida waters. Annually, up to 80 sawfish may be captured by gillnet, longline, or angling gear, measured, passive integrated transponder, roto, dart, and external satellite tagged, tissue, muscle, and blood sampled, and released. Dead sawfish acquired through strandings or from law enforcement confiscations may be sampled for scientific purposes. The permit is authorized for a duration of 5 years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) Was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
