DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL05–19–000]

Golden Spread Electric Cooperative, Inc., Lyntegar Electric Cooperative, Inc., Farmers' Electric Cooperative, Inc., Lea County Electric Cooperative, Inc., Central Valley Electric Cooperative, Inc., Roosevelt County Electric Cooperative, Inc., Complainants v. Southwestern Public Service Company, Respondent; Notice of Complaint

November 3, 2004.

Take notice that on November 2,
2004, Golden Spread Electric
Cooperative, Inc. (Golden Spread)
Lyntegar Electric Cooperative, Inc.,
Farmers' Electric Cooperative, Inc., Lea
County Electric Cooperative, Inc.,
Central Valley Electric Cooperative, Inc.,
and Roosevelt County Electric
Cooperative, Inc. (collectively referred
to as the Cooperative Customer Group)
filed a Complaint Requesting
Investigation and Hearing of Cost-Based
Rates and Fuel Adjustment Clause
Charges, and Establishment of Refund
Effective Date against Respondent
against Southwestern Public Service
Company (SPS). The Cooperative
Customer Group states that (1) SPS'
cost-based rates for full and partial
requirements service are excessive, are
not just and reasonable and are unduly
discriminatory or preferential; and (2)
SPS has historically and continues to
violate the applicable fuel charge
adjustment clause (FCAC) provisions of
the FERC-filed rate schedules applicable
to each of its customers, and the
Commission's FCAC Regulations.

Any person desiring to intervene or to
protest this filing must file in
accordance with Rules 211 and 214 of
the Commission's Rules of Practice and
Procedure (18 CFR 385.211, 385.214).

Protests will be considered by the
Commission in determining the
appropriate action to be taken, but will
not serve to make protestants parties to
the proceeding. Any person wishing to
become a party must file a notice of
intervention or motion to intervene, as
appropriate. The Respondent's answer
and all interventions, or protests must
be filed on or before the comment date.
The Respondent's answer, motions to
intervene, and protests must be served
on the Complainants.

The Commission encourages
electronic submission of protests and
interventions in lieu of paper using the
"eFiling" link at <http://www.ferc.gov>.
Persons unable to file electronically
should submit an original and 14 copies
of the protest or intervention to the
Federal Energy Regulatory Commission,
888 First Street, NE., Washington, DC
20426.

This filing is accessible on-line at
<http://www.ferc.gov>, using the
"eLibrary" link and is available for
review in the Commission's Public
Reference Room in Washington, DC.
There is an "eSubscription" link on the
Web site that enables subscribers to
receive e-mail notification when a
document is added to a subscribed
docket(s). For assistance with any FERC
Online service, please e-mail
FERCOnlineSupport@ferc.gov, or call
(866) 208–3676 (toll free). For TTY, call
(202) 502–8659.

Comment Date: 5 p.m. eastern time on
December 2, 2004.

Linda Mitry,

Deputy Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[Regional Docket Nos. II–2002–05, –06, –11;
FRL–7835–8]

Clean Air Act Operating Permit Program; Petitions for Objection to State Operating Permits for the Keyspan Generation Far Rockaway Station, Motiva Enterprises, LLC, and the New York City Department of Environmental Protection North River Water Pollution Control Plant

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice of final orders,
addressing three State operating
permits.

SUMMARY: This document announces
that the EPA Administrator has
addressed four citizen petitions asking

EPA to object to operating permits issued to three facilities by the New York State Department of Environmental Conservation (NYSDEC). Specifically, the Administrator has partially granted and partially denied three petitions submitted by the New York Public Interest Research Group (NYPIRG) to object to the state operating permits issued to the Keyspan Generation Far Rockaway Station, Motiva Enterprises, LLC, and the New York City Department of Environmental Protection (NYCDEP) North River Water Pollution Control Plant. Additionally, the Administrator has partially granted and partially denied a petition submitted by the NYCDEP, requesting our objection to its own operating permit for the North River plant. Pursuant to section 505(b)(2) of the Clean Air Act (Act), petitioners may seek judicial review of those portions of the petitions which EPA denied in the United States Court of Appeals for the appropriate circuit. Any petition for review shall be filed within 60 days from the date this notice appears in the **Federal Register**, pursuant to section 307 of the Act.

ADDRESSES: You may review copies of the final orders, the petitions, and other supporting information at the EPA Region 2 Office, 290 Broadway, New York, New York 10007-1866. If you wish to examine these documents, you should make an appointment at least 24 hours before visiting day. Additionally, the final orders are available electronically at: <http://www.epa.gov/region07/programs/artd/air/title5/petitiondb/petitiondb2002.htm>.

FOR FURTHER INFORMATION CONTACT: Steven Riva, Chief, Permitting Section, Air Programs Branch, Division of Environmental Planning and Protection, EPA Region 2, 290 Broadway, 25th Floor, New York, New York 10007-1866, telephone (212) 637-4074.

SUPPLEMENTARY INFORMATION: The Act affords EPA a 45-day period to review, and object to as appropriate, operating permits proposed by state permitting authorities. Section 505(b)(2) of the Act authorizes any person to petition the EPA Administrator within 60 days after the expiration of this review period to object to state operating permits if EPA has not done so. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period.

I. Keyspan

On July 5, 2002, the EPA received a petition from NYPIRG, requesting that EPA object to the issuance of the title V operating permit for the Keyspan Generation Far Rockaway Station. On September 24, 2004, the Administrator issued an order partially granting and partially denying the Keyspan petition. The order explains the reasons behind EPA's conclusion that the NYSDEC must determine whether to retain or delete a condition relating to burning waste-oil in the utility boiler. If this condition is to be retained, the NYSDEC must incorporate additional requirements, and discuss applicability in the corresponding Permit Review Report. The order also explains EPA's reasons for denying NYPIRG's remaining claims.

II. Motiva

On May 23, 2002, the EPA received a petition from NYPIRG, requesting that EPA object to the issuance of the title V operating permit for Motiva Enterprises, LLC. On September 24, 2004, the Administrator issued an order partially granting and partially denying the Motiva petition. The order explains the reasons behind EPA's conclusion that the NYSDEC must: (1) Provide information on the methods used in creating the emission statement; (2) prescribe opacity monitoring for the Vapor Recovery Unit; (3) include additional requirements that are applicable to bulk gasoline terminals; (4) state that reporting is due semi-annually for the facility's average daily gasoline throughput; (5) specify which type of control is in place at the Fixed Roof storage tanks; (6) specify that a record will be generated whenever activities pertaining to the replacement of any liquid mounted seal are performed; (7) state that facility is subject to a gasoline throughput limit of 526,900,000 gallons/yr; and (8) reference emission calculations together with any applicable technical basis. The order also explains EPA's reasons for denying NYPIRG's remaining claims.

III. North River

On October 1 and 4, 2002, the EPA received petitions from NYPIRG and the NYCDEP, requesting that EPA object to the issuance of the title V operating permit for the NYCDEP North River Water Pollution Control Plant. On September 24, 2004, the Administrator issued an order partially granting and partially denying both North River petitions. The order explains the reasons behind EPA's conclusion that the NYSDEC must reopen the permit to:

(1) Move the hydrogen sulfide requirements to the state-only enforceable portion of the permit; (2) include requirements for exempt activities where applicable; (3) require annual certification of federally enforceable terms as directed by EPA; (4) include the SIP "excuse" provision codified at 6 NYCRR section 201.5(e); (5) include additional monitoring for NO_x from the engines; (6) specify the degree of air cleaning required by 6 NYCRR section 212.4(a) for the wastewater, sludge and miscellaneous processes, and include appropriate monitoring; and (7) clarify the applicability of 6 NYCRR section 230.2 and include appropriate permit conditions. In addition, several issues require the NYSDEC to provide a revised statement of basis that: (1) Explains how the sulfur in fuel monitoring is consistent with the city's contract; (2) clarifies the rationale for including multiple monitoring requirements for opacity from the engines; (3) clarifies the applicability of exempt and trivial activities as well as the general opacity regulation; (4) explains its reasons for concluding the facility is a non-industrial POTW; and (5) clarifies the applicability of CAA section 112(r). The order also explains EPA's reasons for denying the petitioners' remaining claims.

Dated: November 1, 2004.

Jane M. Kenny,

Regional Administrator, Region 2.
