

VII. Statutory Authority

NEPA [42 U.S.C. 4321 *et seq.*] requires that Federal agencies conduct an environmental analysis of their proposed actions to determine if the actions may significantly affect the human environment. In addition, as required by NEPA, the Bureau of Reclamation analyzed the potential direct, indirect, and cumulative environmental effects that may result from the implementation of the alternatives, which may include, but are not limited to, the following areas of potential impact:

- a. Surface water and groundwater;
- b. Energy generation and use by CVP and SWP;
- c. Biological resources, aquatic and terrestrial resources;
- d. Land use, including agriculture;
- e. Recreation.
- f. Socioeconomics;
- g. Environmental justice;
- h. Air quality;
- i. Soils and geology;
- j. Visual resources;
- k. Cultural resources;
- l. Public health; and
- m. Indian trust assets.

All alternatives and the Second Basis of Comparison were analyzed assuming conditions at Year 2030 with associated climate change and sea level rise.

SUPPLEMENTARY INFORMATION:

Authority: 44 U.S.C. 3507(a)(1)(D).

This ICR seeks to extend PRA authority for the Occupational Noise Exposure information collection requirements codified in regulations 30 CFR part 62. Noise is a harmful physical agent and one of the most pervasive health hazards in mining. Repeated exposure to high levels of sound over time causes occupational noise-induced hearing loss (NIHL), a serious and often profound physical impairment in mining, with far-reaching psychological and social effects. NIHL can be distinguished from aging and other factors that can contribute to hearing loss, and it can be prevented. According to the National Institute for Occupational Safety and Health, NIHL is among the top ten leading occupational illnesses and injuries.

Records of miner exposures to noise are necessary so that mine operators and the MSHA can evaluate the need for and effectiveness of engineering controls, administrative controls, and personal protective equipment to protect miners from harmful levels of noise that can result in hearing loss. The Agency believes, however, that extensive records are not needed for this purpose. The subject information collection requirements are part of a performance-oriented approach to monitoring. Miner hearing examination records enable mine operators and the MSHA to ensure controls in use are effective in preventing NIHL for individual miners. Training records confirm miners receive information necessary to become active participants in hearing conservation efforts. Federal Mine Safety and Health

Act of 1977 sections 101(a)(6) and 103(c) and (h) authorize this information collection. See 30 U.S.C. 811(a)(6); 813(c), (h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0120.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on August 31, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 11, 2015 (80 FR 26953).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219-0120. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other

technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION:

I. Abstract

The NASA Contractor Financial Management Reporting System is the basic financial medium for contractor reporting of estimated and incurred costs, providing essential data for projecting costs and hours to ensure that contractor performance is realistically planned and supported by dollar and labor resources. The data provided by these reports is an integral part of the Agency's accrual accounting and cost based budgeting system. Respondents are reimbursed for associated cost to provide the information, per their negotiated contract price and associated terms of the contract. There are no "total capital and start-up" or "total operation and maintenance and purchase of services" costs associated since NASA policy requires that data reported is generated from the contractors' existing system. The contractors' internal management system shall be relied upon to the maximum extent possible.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

II. Method of Collection

NASA collects this information electronically and that is the preferred manner, however information may also be collected via mail or fax.
