Salmon Falls River	43°13'36.97946"	-70°48'40.68515"

The State of New Hampshire has certified that there are six pumpout facilities located on the New Hampshire coastline to service vessels within the proposed NDA. A list of the facilities, phone numbers, locations, and hours of operation is appended at the end of this petition. There are five shore-based facilities, four of these facilities discharge directly to the town sewer, and one facility discharges into a 3,000 gallon tight tank. The area is also serviced by a pumpout boat which discharges into the town sewer. In addition, there are six restroom facilities available at marinas and boat launches, and another five restroom facilities available to the boating public, that are not associated with marinas.

The State of New Hampshire used three different methods to estimate the total vessel population in the proposed NDA, and used the highest total estimate of 4,593 in their calculations to determine the number of pumpout facilities needed to adequately serve the boating public. The transient vessel population is estimated to be 1,689 at

any point in time during the boating season, which is included in the total figure. Of the estimated total of 4,593 vessels using this area at any given time, approximately 962 are of a size that may have sewage holding tanks and need pumpout services. The State has determined that the six pumpout facilities currently in service in the proposed NDA are sufficient to meet the potential demand and prevent the discharge of vessel sewage into coastal waters.

The coastline and coastal waters within the proposed NDA contain a variety of rich natural habitats and support a wide diversity of species, providing a range of recreational and commercial activities. There are 16 public beaches, 12 public boat ramps, three historic sites, four science and nature centers, and the Great Bay National Wildlife Refuge. Great Bay, along with New Hampshire's other, smaller estuaries, is part of the National Estuary Program, having been designated an "estuary of national significance" by EPA. The New

Hampshire coastal area is also part of the larger ecosystem of the Gulf of Maine, which is the subject of an international ecosystem management program involving the United States and Canada. Both recreational and commercial shell fishermen use the area for the harvest of soft shell clams, oysters, blue mussels, surf clams, razor clams, and mahogany quahogs. In addition, recreational fishing is popular and the species found in the area are smelt, small cod, flounder, haddock, pollock, and striped bass.

Comments and reviews regarding this request for action may be filed on or before August 22, 2005. Such communications, or requests for information or a copy of the applicant's petition, should be addressed to Ann Rodney, U.S. Environmental Protection Agency—New England Region, One Congress Street, Suite 1100, COP, Boston, MA 02114–2023. Telephone: (617) 918–1538.

Dated: June 28, 2005.

Robert W. Varney,
Regional Administrator.

Clean Water Act Section 303(d): Final Agency Action on Four Total Maximum Daily Loads (TMDLs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces final agency action on four TMDLs prepared by EPA Region 6 for waters listed in Louisiana's Barataria river basin, under section 303(d) of the Clean Water Act (CWA). Documents from the administrative record file for the four TMDLs, including TMDL calculations and responses to comments, may be viewed at <http://www.epa.gov/region6/water/tmdl.htm>. The administrative record file may be examined by calling

or writing Ms. Diane Smith at the following address. Please contact Ms. Smith to schedule an inspection.

FOR FURTHER INFORMATION CONTACT: Diane Smith, Environmental Protection Specialist, Water Quality Protection Division, U.S. EPA Region 6, 1445 Ross Avenue, Dallas, TX 75202–2733, (214) 665–2145.

SUPPLEMENTARY INFORMATION: In 1996, two Louisiana environmental groups, the Sierra Club and Louisiana Environmental Action Network (plaintiffs), filed a lawsuit in Federal

Court against the EPA, styled *Sierra Club, et al. v. Clifford et al.*, No. 96–0527, (E.D. La.). Among other claims, plaintiffs alleged that EPA failed to establish Louisiana TMDLs in a timely manner.

EPA Takes Final Agency Action on Four TMDLs

By this notice EPA is taking final agency action on the following four

TMDLs for waters located within the Barataria river basin:

Subsegment	Waterbody name	Pollutant
020201	Bayou Des Allemands—Lac Des Allemands to Hwy. U.S. 90 (scenic).	Dissolved Oxygen.
020201	Bayou Des Allemands—Lac Des Allemands to Hwy. U.S. 90 (scenic).	Nutrients.
020303	Lake Cataouatche and Tributaries	Dissolved Oxygen.
020303	Lake Cataouatche and Tributaries	Nutrients.

EPA requested the public to provide EPA with any significant data or information that might impact the four TMDLs in the **Federal Register** Notice: 69 FR 69924 (December 1, 2004). The comments received and the EPA's response to comments may be found at <http://www.epa.gov/region6/water/tmdl.htm>.

Dated: June 28, 2005.

William K. Honker,

Acting Director, Water Quality Protection Division, Region 6.

Clifford et al.*, No. 96–0527, (E.D. La.). Among other claims, plaintiffs alleged that EPA failed to establish Louisiana TMDLs in a timely manner.

EPA Takes Final Agency Action on Six TMDLs

By this notice EPA is taking final agency action on the following six TMDLs for waters located within Louisiana basins:

Subsegment	Waterbody name	Pollutant
010901	Atchafalaya Bay and Delta and Gulf Waters to the State 3-mile Limit	Mercury.
021102	Barataria Basin Coastal Bays and Gulf Waters to the State 3-mile Limit	Mercury.
042209	Lake Pontchartrain Basin Coastal Bays and Gulf Waters to the State 3-mile Limit ...	Mercury.
070601	Mississippi River Basin Coastal Bays and Gulf Waters to the State 3-mile Limit	Mercury.
110701	Sabine River Basin Coastal Bays and Gulf Waters to the State 3-mile Limit	Mercury.
120806	Terrebonne Basin Coastal Bays and Gulf Waters to the State 3-mile Limit	Mercury.

EPA requested the public to provide EPA with any significant data or information that might impact the six TMDLs in the **Federal Register** Notice 70 FR 19760 (April 14, 2005). The comments received and EPA's response to comments may be found at <http://www.epa.gov/region6/water/tmdl.htm>.

Dated: June 28, 2005.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7935–8]

Clean Water Act Section 303(d): Notice Final Agency Action Withdrawing Nine Total Maximum Daily Loads (TMDLs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Withdrawal of nine TMDLs.

Subject: This notice announces EPA final action withdrawing nine TMDLs in

the water column that EPA established pursuant to the Clean Water Act (“CWA”) section 303(d) in Louisiana. EPA is withdrawing these nine TMDLs because on September 22, 2003, Louisiana promulgated revisions to the Louisiana water quality standards regulations (LAC 33:IX, 1123.C.1).

Background: Louisiana revised its water quality standards for chloride, sulfate and TDS for subsegments 060204, 060211, and 060301; and for sulfate and TDS for subsegments 060801 and 060802 located in the Vermillion-
