Abstract: This ICR covers the paperwork burden under the PRA that is associated with two types of pesticide registration requests made by States, U.S. Territories, or Federal agencies. Specifically, this ICR covers emergency exemption requests, which allow for an unregistered use of a pesticide, and State registrations of a pesticide use to meet a special local need (SLN). FIFRA section 18 authorizes EPA to grant emergency exemptions to States, U.S. Territories, and Federal agencies to allow an unregistered use of a pesticide for a limited time if EPA determines that emergency conditions exist. FIFRA Section 18 requests include unregistered pesticide use exemptions for specific agricultural, public health, quarantine and crisis purposes. FIFRA Section 24(c) authorizes any particular State to register additional uses of a federally registered pesticide for distribution and use within that state to meet a SLN.

Form Numbers: 8570-25 & 8570-4.

Respondents/Affected Entities: States and Federal government agencies and pesticide, fertilizer, and other agricultural chemical manufacturing.

Respondent's obligation to respond: Mandatory under FIFRA Sections 3 and 11.

Frequency of response: On Occasion.

Estimated total number of potential respondents: 283.

Estimated total burden: 25,753 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total costs: \$ 1,829,103 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is no change in the number of hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB.

Dated: December 11, 2020.

II. Notice of Availability

A. Legal Authority.

This notice is published under the authority of the CWA, 33 U.S.C. 1251, *et seq.*, and in particular Sections 301(d), 304(b), 304(g), 304(m), 306, 307(b) and 308 of the Act, 33 U.S.C. 1311(d), 1314(b), 1314(g), 1314(m), 1316, 1317(b), and 1318.

B. Summary of Preliminary Effluent Guidelines Program Plan 14

EPA prepared Plan 14 pursuant to CWA Section 304(m). Effluent guidelines plans provide a summary of EPA's annual review of effluent guidelines and pretreatment standards, consistent with CWA Sections 301(d), 304(b), 304(g), 304(m), and 307(b). From these reviews, the plans identify any new or existing industrial categories selected for effluent guidelines or pretreatment standards rulemakings and provide a schedule for such rulemakings. In addition, the plans present any new or existing categories of industry selected for further review and analysis. Plan 14 provides updates on activities discussed in Preliminary Effluent Guidelines Program Plan 14 (Preliminary Plan 14) and discusses comments that were received during the public comment period.

EPA received 17 unique comment letters on Preliminary Plan 14. Commenters generally provided suggestions for improving certain analyses as well as comments for EPA to consider as it continues work on the detailed studies discussed in the Plan. EPA considered public comments and made revisions to clarify the final document, but did not change course on

any substantive areas of ELG work as a result of public comments.

Plan 14 presents preliminary results from some new analyses and provides updates on EPA's reviews of industrial wastewater discharges and treatment technologies discussed in Preliminary Plan 14 including analyses of industrial sources and discharges of nutrients, proposed treatment technology reviews, and the effluent limitations guidelines database.

Plan 14 also provides updates on ongoing point source category studies, including EPA's decision to conclude the Petroleum Refining Category and planned next steps for the detailed study on the Electrical and Electronic Components Category. Plan 14 provides an update on the Pre- and Polyfluoroalkyl Substances (PFAS) Multi-Industry study, the scope of which includes organic chemical manufacturers, airports, rug and textile manufacturers, pulp and paper manufacturers, and the metal finishing point source category (added to the scope of the study after the Preliminary Plan 14 was published). Plan 14 discusses the types of information regarding PFAS that has been received to date, that EPA primarily received this information through outreach to stakeholders, and that EPA continues to evaluate this information to inform decisions about how best to address industrial PFAS discharges.

Finally, Plan 14 discusses several actions that are included in EPA's Fall Regulatory Agenda, including initiating an effort to evaluate the best available technology economically available limitations for two waste streams (landfill leachate and legacy wastewater) for the steam electric power generating point source category that were vacated in an April 2019 decision in U.S. Court of Appeals for the Fifth Circuit; and an advance notice of proposed rulemaking for the Organic Chemicals, Plastics, and Synthetic Fibers point source category to solicit additional information or data about PFAS manufacturers and formulators.

Plan 14 can be found at <http://www.epa.gov/eg/effluent-guidelines-plan>.
