

The length of time during which replacement study group drivers will be added will be determined by FMCSA based on the statistical and administrative needs of the pilot data collection plan.

FMCSA would adapt the applications, agreements, forms to be used by interested carriers and potential study and control group drivers, and plans it created for its Under 21 Military CDL Pilot Program for this younger driver pilot program.

In addition to the above requirements, FMCSA is proposing that each motor carrier accepted into the pilot program must agree to comply with all pilot program procedures and requirements, including completing required forms, obtaining driver consent, and attending information sessions.

Control Group Drivers

Details of each requirement for control group drivers summarized below would be published if the pilot program is approved. Control group drivers would be required to:

- Agree to participate;
- Possess a valid CDL;
- Be a driver for participating motor carrier;
- Have no disqualifications, suspensions, or license revocations within past 2 years; or be under any OOS order;
- Agree to release of specified information for the pilot program;
- Have experience comparable to study group drivers; and
- Be 21 to 24 years old at time of acceptance into the pilot.

VI. Data Collection Plan

The factors to be collected from each participating driver before and during the pilot program may include, but are not limited to: (1) Details of any past CMV driving experience and employment information to assess qualification for participation in the study and/or control groups; (2) crashes (to be specified); (3) any traffic citations or warnings received while driving a CMV; (4) any violations or warnings listed on a CMV inspection report when the participating driver was operating the vehicle; and (5) detailed 24-hour records of activity to include CMV hours-of-service logs or electronic records. Some of this information would be automatically reported to FMCSA; however, due to possibility of delays in reporting and inaccurate data in some instances, the participating carrier would be asked to collect the information from all participating drivers and report it to FMCSA in a designated format. Other information

that may be needed, such as vehicle miles traveled, would also be collected through the participating carrier. Every effort would be made to minimize the burden on the carrier in collecting and reporting this data.

VII. Paperwork Reduction Act

The proposed pilot program would require participating motor carriers to collect, maintain, and report to FMCSA certain information about their employed/sponsored drivers who are participating in the pilot program. This would include identifying information and safety performance data for use in analyzing the drivers' safety history. The Agency would revise the forms developed for the Under-21 Military Driver pilot program to promote uniformity in the data collected by the pilot carriers.

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) prohibits agencies from conducting information collection (IC) activities until they analyze the need for the collection of information and how the collected data would be managed. Agencies must also analyze whether technology could be used to reduce the burden imposed on those providing the data. The Agency must estimate the time burden required to respond to the IC requirements, such as the time required to complete a particular form. The Agency submits its IC analysis and burden estimate to the Office of Management and Budget (OMB) as a formal information collection request (ICR); the Agency cannot conduct the information collection until OMB approves the ICR. FMCSA asks for comment on the IC requirements of this proposal. The Agency's analysis of these comments would be used in devising the Agency's estimate of the IC burden of the pilot program. Comments can be submitted to the docket as outlined under **ADDRESSES** at the beginning of this notice. Specifically, the Agency asks for comment on: (1) How useful the information is and whether it can help FMCSA perform its functions better; (2) how the Agency can improve the quality of the information being collected; (3) the accuracy of FMCSA's estimate of the burden of this IC; and (4) how the Agency can minimize the burden of collection.

Because this is a proposed pilot program in which certain aspects—such as the content of forms and reports—have not been finalized, the Agency is not posting the possible IC burden data at this time. If the pilot program is to be implemented, this information would be posted at a later date and additional comments would be taken.

VIII. Monitoring and Oversight

FMCSA would review both monthly data submitted by approved motor carriers and its own databases including, but not limited to, MCMIS, Safety Measurement System, Commercial Driver's License Information System, the Licensing and Insurance system, and the Drug and Alcohol Clearinghouse. FMCSA reserves the right to remove any motor carrier or driver from the pilot program for reasons including, but not limited to, failing to meet any of the requirements of the program.

IX. Length of Program

FMCSA expects this program to run for 3 years but may conclude the program sooner if there is sufficient data to analyze the safety of covered drivers.

X. Request for Public Comments

The following questions identify input desired by FMCSA. Instructions for filing comments to the public docket are included earlier in this notice. Persons are encouraged to respond wherever possible by reference to the question number, but comments are not limited to replies to these questions:

1. Should FMCSA consider any additional safeguards to ensure that the pilot program provides an equivalent level of safety to the regulations without the age exemption?
2. Would carriers be able to obtain enough drivers to serve in the control group?
3. Would the vehicle technology requirements proposed for study group drivers limit participation by smaller companies?
4. Should FMCSA limit the distance that study group drivers should be allowed to operate (e.g., 150 air-mile radius, 250 air-mile radius)?
5. Are the data collection efforts proposed so burdensome for carriers as to discourage their participation?
6. Should we limit participation to drivers who have not been involved in a preventable crash?

James A. Mullen,
Deputy Administrator.
