Abstract: This information collection provides disaster survivors the opportunity to request approval of late

applications, continued temporary housing assistance, request advance disaster assistance, stop payments not received in order to be reissued funds, and to appeal program decisions. This collection also allows for the establishment of an annual agreement between FEMA and states, territories, and tribal governments regarding how the Other Needs Assistance provision of IHP will be administered: by FEMA, by the state, territory, or tribal government, or jointly. This collection allows survivors to provide additional information after the initial disaster assistance registration period in support of their applications for assistance from FEMA's IHP. If the information in this collection is not collected, a delay in assistance provided to disaster survivors would occur.

You may contact the Information Management Division for copies of the proposed collection of information at email address: FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: Public Law 114-143, the Integrated Public Alert and Warning System Modernization Act of 2015, and Presidential Executive Order 13407, Public Alert and Warning System, establishes the policy for an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and wellbeing. The Integrated Public Alert and Warning System (IPAWS) is the Department of Homeland Security's response to the Executive Order. The Stafford Act (42 U.S.C. 5121, *et seq.*, Pub. L. 93-288, as amended) requires that FEMA make IPAWS available to Federal, State, and local agencies for the purpose of providing warning to governmental authorities and the civilian population in areas endangered by disasters. The information collected is used by FEMA to create a Memorandum of Agreement that regulates the management, operations, and security of the information technology system connection between a Federal, State, Tribal, territorial, or local alerting authority and IPAWS-OPEN (Open Platform for Emergency Notifications).

The IPAWS Public Alerting Authorization application captures information detailing which types of events the local jurisdiction wants to be configured to use IPAWS for and which primary dissemination channels should be available. For example, if a community wants to send a Civil Emergency message (CEM) to broadcast across radio, television, and cable, they will request "CEM" for "EAS"—the Emergency Alert System. These requested permissions are reviewed by either the State or by Tribal authorities for compliance with established overall alerting policies and plans. IPAWS uses the approved information to configure permissions in IPAWS-OPEN.
