In undertaking these duties, the Commission will examine specific bioethical, legal, and social issues related to potential scientific and technological advances; examine diverse perspectives and possibilities for useful international collaboration on these issues; and recommend legal, regulatory, or policy actions as appropriate.

The main agenda items for this fourth meeting involve genetics, neuroscience, and neuroimaging; and a review of human subjects protection. Specifically, the Commission is interested in exploring social and ethical issues involving genetics, neuroscience, and neuroimaging used for research, diagnosis, risk identification, and prevention. The Commission will also begin its review of human subjects protection as requested by President Obama on November 24, 2010.

The draft meeting agenda and other information about PCSBI, including information about access to the webcast, will be available at <http://www.bioethics.gov>.
