These records may help streamline and make more efficient the processing of requests and FOIA processes, while ensuring compliance with applicable laws and regulations, including confidentiality requirements protecting the information individuals submit in support of their request or claims in the FOIA inquiry process. Individuals can also submit their FOIA request via PAL.

SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on October 25, 2023 (88 FR 73354). We received one comment which did not address the information collection requirements. No response to that comment is required.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are

especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: In an effort to address current known biases in goose harvest data collection, our research project aims to test the efficacy of a new online data submission platform; streamline multiple concurrent surveys into one centralized survey; and reduce the cost and time of compiling and analyzing survey data for Federal and state agencies who use these data to inform management decisions. We are proposing the development and testing of an online, mobile-friendly, self-submission data platform for hunters to enumerate and speciate their own goose harvest. The goals are to develop and evaluate the platform; compare resulting data streams with current paper and parts collection surveys to evaluate accuracy and bias; and understand hunter satisfaction with the system.
