### **DEPARTMENT OF ENERGY**

Energy Employees Occupational Illness Compensation Act of 2000; Revision to List of Covered Facilities

**AGENCY:** Department of Energy. **ACTION:** Notice of revision of listing of covered facilities.

SUMMARY: On January 17, 2001, and again on June 11, 2001, the Department of Energy ("Department" or "DOE") published a list of facilities covered under the Energy Employees Occupational Illness Compensation Act of 2000 ("Act"), title 36 of Public Law 106-398. (66 FR 4003; 66 FR 31218). The Act establishes a program to provide compensation to individuals who developed illnesses as a result of their employment in nuclear weapons production-related activities and at certain federally-owned facilities in which radioactive materials were used. This notice revises the previous lists and provides additional information about the covered facilities, atomic weapons employers, and beryllium vendors. The original notice provides detailed background information about this matter.

# **FOR FURTHER INFORMATION CONTACT:** Office of Worker Advocacy, 1–877–447–9756.

ADDRESSES: The Department welcomes comments on this list. Individuals who wish to suggest additional facilities for inclusion on the list or indicate why one or more facilities should be removed from the list should provide information to the Department. Comments should be addressed to: Office of Worker Advocacy (EH–8), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. Email: worker\_advocacy@eh.doe.gov. Tollfree: 1–877–447–9756.

### SUPPLEMENTARY INFORMATION:

### **Purpose**

The Energy Employees Occupational Illness Compensation Act of 2000 ("Act"), title 36 of Public Law 106–398, establishes a program to provide compensation to individuals who

developed illnesses as a result of their employment in nuclear weapons production-related activities and at certain federally-owned facilities in which radioactive materials were used. On December 7, 2000, the President issued Executive Order 13179 ("Order") directing the Department of Energy ("Department" or "DOE") to list covered facilities in the Federal Register, which the Department did on January 17, 2001, and again on June 11, 2001. This notice revises the previous lists and provides additional information about the covered facilities, atomic weapons employers, and beryllium vendors.

Section 2. c. iv of the Order instructs the Department to designate, pursuant to sections 3621(4)(B) and 3622 of the Act, atomic weapons employers and additions to the list of designated beryllium vendors. In addition, section 2. c. vii of the Order instructs the Department to list three types of facilities defined in the Act:

(1) Atomic weapons employer facilities, as defined in section 3621(4);

(2) Department of Energy facilities, as defined by section 3621(12); and

(3) Beryllium vendors, as defined by section 3621(6).

Compensation options and mechanisms are defined differently for each of these facility categories. The atomic weapons employer category includes atomic weapons employer facilities in which the primary work was not related to atomic weapons, and consequently these facilities are not commonly known as atomic weapons facilities. Their inclusion in this list is consistent with the Act, and is not intended as a classification for any other purpose.

The list at the end of this notice represents the Departments best efforts to date to compile a list of facilities under these three categories. This listing includes 350 facilities in 42 iurisdictions. It designates 29 additional beryllium vendor facilities, two additional Atomic Weapons Employer facilities and clarifies the status as Department of Energy facility for 13 facilities. The designation of the 29 additional beryllium vendor facilities represents the Departments best efforts to meet its statutory deadline in Pub. L. 106-398 § 3622 which sets a December 31, 2002, deadline for designating additional beryllium vendors.

To assist the public in understanding changes made in this list, the Department has prepared a description of these changes and made it available at the website noted. A copy may also be obtained by request to the Office of Worker Advocacy. The Department is continuing its research efforts, and

continued revisions to this list should be expected. The public is invited to comment on the list and to provide additional information.

In addition to continuing its research efforts, the Department has developed information dissemination mechanisms to make facility-specific data available to the public. Information about each listed facility, including the dates and type of work done there, is available by contacting the Office of Worker Advocacy. These descriptions are available in print form and also electronically (via the World Wide Web at http://tis.eh.doe.gov/advocacy/).

The list that follows covers facilities under the three categories of employers defined by the Act: atomic weapons employers ("AWE"), Department of Energy facilities ("DOE"), and beryllium vendors ("BE"). Each of the categories has been defined in the original notice and include:

### 1. Atomic Weapons Employers and Atomic Weapons Employer Facilities

The lines between research, atomic weapons production, and non-weapons production are often difficult to draw. For the purposes of this notice, and as directed by the Act, only those facilities

whose work involved radioactive material that was connected to the atomic weapons production chain are included. This includes facilities that received radioactive material that had been used in the production of an atomic weapon, or the back end of the production cycle, such as waste handling or reprocessing operations. For the purposes of this listing, the Department considers commercial nuclear fuel fabrication facilities to be covered facilities for those periods when they either supplied radioactive materials to the Department or received radioactive materials that had been used in the Departments production reactors.

Corporate information regarding many of the listed facilities is often not readily available. The Department welcomes comments or additional information regarding facilities that may have supported atomic weapons production that are not on this list, as well as information that clarifies the work done at facilities named below.

### 2. Department of Energy Facilities

The listing of Department of Energy facilities is only intended for the context of implementing this Act and does not create or imply any new Departmental obligations or ownership at any of the facilities named on this list.

### 3. Beryllium Vendors and Beryllium Vendor Facilities

Section 3621(6) of the Act defines beryllium vendor as the following:

- "(A) Atomics International.
- (B) Brush Wellman, Incorporated, and its predecessor, Brush Beryllium Company.
  - (C) General Atomics.
  - (D) General Electric Company.
- (E) NGK Metals Corporation and its predecessors, Kawecki-Berylco, Cabot Corporation, BerylCo, and Beryllium Corporation of America.
- (F) Nuclear Materials and Equipment Corporation.
- (G) StarMet Corporation, and its predecessor, Nuclear Metals, Incorporated.
  - (H) Wyman Gordan, Incorporated.
- (I) Any other vendor, processor, or producer of beryllium or related products designated as a beryllium vendor for purposes of this title under Section 3622."

The list identifies facilities that processed, produced, or provided beryllium metal for the Department, as defined by the Act.

## Federal Energy Regulatory Commission

[Docket No. CP03-28-000]

### Tennessee Gas Pipeline Company; Notice of Request Under Blanket Authorization

December 20, 2002.

Take notice that on December 17. 2002, Tennessee Gas Pipeline Company (Tennessee), 9 E. Greenway Plaza, Houston, Texas 77046, filed an application pursuant to sections 157.205 and 157.208 of the Commission's Regulations under the Natural Gas Act ("NGA"), for authority to increase the maximum allowable operating pressure (MAOP) on two supply laterals located in San Jacinto and Polk counties, Texas. Tennessee proposes to perform this activity under its blanket certificate issued in Docket No. CP82-413-000. This application is on file with the Commission and open to public inspection. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at http:// www.ferc.gov using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at

FERCOnlineSupport@ferc.gov or toll-free at (866)208–3676, or for TTY, contact (202)502–8659.

Specifically, Tennessee seeks authority to increase the MAOP of its West Ace ("Line 27A-100") and its West Ace—Duke and New Ace lateral ("Line 27A-200") from 663 to 750 psig to facilitate receipts of natural gas. Tennessee states that Lines 27A-100 and 27A-200 are supply laterals connected to Tennessee's mainline. Tennessee explains that the operating pressure of its mainline is 750 psig, but whenever the pressure on the mainline exceeds 648 psig, producers on the laterals must be shut in to avoid pressure buildup that exceeds the 663 psig MAOP limits on the two laterals. Tennessee proposes these uprates on the two laterals so that it can consistently and reliably receive natural gas from the affected producers located on these lateral lines. Tennessee estimates that the project will cost approximately \$43,300.

Tennessee states that: (1) The proposed increases in MAOP for the two laterals do not require the construction of any new pipeline facilities and will not involve any ground disturbance; (2) the uprate testing will be performed using nitrogen gas, and therefore Tennessee expects no adverse environmental impact; and (3) all work will be performed within Tennessee's existing rights-of-way.

Any questions regarding this application should be directed to Veronica Hill, Certificates & Regulatory Compliance, Tennessee Gas Pipeline Company, 9 E Greenway Plaza, Houston, Texas 77046, at 832–676–3295 or FAX 832–676–2231.

Any person or the Commission's staff may, within 45 days after issuance of

the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and, pursuant to section 157.205 of the Regulations under the NGA (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper; see 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. The Commission strongly encourages electronic filings.

### Magalie R. Salas,

Secretary.
