

individuals for review and comment in September 15, 2002. Public meetings were held as needed to keep all interested parties informed of the study progress and to obtain public input to the plan and environmental evaluation.

Agency consultation and public participation to date have shown no unresolved conflicts with the implementation of the selected plan.

#### Conclusion

The Environmental Assessment summarized above indicates that this federal action will not cause significant local, regional, or national impacts on the environment. Therefore, based on the above findings, I have determined that an environmental impact statement for the Mill Creek Watershed Plan Supplement is not required.
