SUPPLEMENTARY INFORMATION: At the March 2019 Pacific Council meeting, the National Marine Fisheries Service (NMFS) announced plans to reinstate Endangered Species Act (ESA) consultation on the effect of Pacific Council-area ocean salmon fisheries on SRKW. NMFS and the Pacific Council agreed on a collaborative approach and began establishing work plans and a tentative schedule. At the April 2019 meeting, the Pacific Council formed the Workgroup to reassess the effects of Pacific Council-area ocean salmon fisheries on the Chinook salmon prey base of SRKW. A draft Terms of Reference was reviewed by the Pacific Council which describes the purpose of the Workgroup, a proposed timeline to accomplish this task, and a list of participants. Supporting documents can be found in the Pacific Council's April

2019 Briefing Book (Agenda Item F.3.a, Supplemental NMFS Report 1, April 2019 and Agenda Item D.6.a, Supplemental NMFS Report 1, April 2019).

The primary purpose of this first work session is to review the purpose of the Workgroup, discuss the current status of SRKW, exchange ideas regarding risk assessment methods and criteria for evaluating Pacific Council salmon fisheries, and to develop a work plan for the first draft of a risk assessment report. The Workgroup may also discuss and consider other items of interest on the Pacific Council's June 2019 meeting agenda. Although non-emergency issues not contained in the Workgroup meeting agenda may come before the Workgroup for discussion, those issues may not be the subject of formal action during this meeting. SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection. A few questions will be rewritten to improve the usefulness of information collected.

The Coastal Zone Management Act of 1972, as amended (CZMA; 16 U.S.C. 1451 *et seq.*) requires that state coastal

management programs and national estuarine research reserves developed pursuant to the CZMA and approved by the Secretary of Commerce be evaluated periodically. This request is for to collect information to accomplish those evaluations.

NOAA's Office for Coastal Management (OCM) conducts periodic evaluations of the 34 coastal management programs and 29 research reserves and produces written findings for each evaluation. OCM has access to documents submitted in cooperative agreement applications, performance reports, and certain documentation required by the CZMA and implementing regulations.

However, additional information from each coastal management program and research reserve, as well as information from the program and reserve partners and stakeholders with whom each works, is necessary to evaluate against statutory and regulatory requirements. Different information collection subsets are necessary for (1) coastal management programs, (2) their partners and stakeholders, (3) research reserves, and (4) their partners and stakeholders.

II. Method of Collection

Coastal program and reserve manager respondents will receive information requests/questionnaires via email, and submittals will be made via email.

Partners and stakeholders of coastal management programs and of reserves will receive a link to a web-based survey tool and respond through the survey tool.

As part of this submission, a few questions will be modified to clarify the information that should be provided as part of the information requests/questionnaires sent to the coastal program and reserve managers. A few questions will be revised to clarify and improve the usefulness of responses for the partners and stakeholders' surveys.
