AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

SUPPLEMENTARY INFORMATION:

A. Background

The Undersecretary of Defense for Acquisition, Technology, and Logistics issued a policy memorandum dated February 6, 2007, that instructed the Director, Defense Procurement and Acquisition Policy, to define the requirements to track warranties for

items subject to Item Unique Identification (IUID) in the IUID registry. This proposed rule addresses the requirement to more effectively track warranties for IUID items.

The tracking of warranties, from the identification of the requirement to the expiration date of the warranted item, will enhance significantly the ability of DoD to take full advantage of warranties when they are part of an acquisition. Presently, DoD lacks the enterprise capability that would provide visibility and accountability of warranty data associated with acquired goods. The capability to track warranties will result in—

- (a) Reduced costs;
- (b) Ability to recognize benefits included for free;
- (c) Ability to compare performance against Government specified warranties;
- (d) Increased level of insurance for purchased goods;
- (e) Sufficient durations of warranties for specific goods;
- (f) Ability to identify and enforce warranties (e.g., against fraudulent vendors, or for criminal actions).

DoD proposes the following changes:

- Revise DFARS 211.274-2(a)(4), Policy for unique item identification, to add any warranted item.
- Revise the definitions of "acceptance" and "defect," and add a definition for "warranty tracking" at DFARS 246.701.
- Add DFARS 246.710(5) to include provision and clause prescriptions 252.246-70XX and 252.246-70YY.
- Revise DFARS 252.211-7003, Item Identification and Valuation, definition of "issuing agency."
- Add provision 252.246-70XX, Notice of Warranty Tracking of Serialized Items.
- Add clause 252.246-70YY, Warranty Tracking of Serialized Items.

This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 20, 1993. This is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

DoD has prepared an initial regulatory flexibility analysis consistent with 5 U.S.C. 603 *et seq.* A copy of the analysis may be obtained from the point of contact specified herein. The objective of this rule is for DoD to develop a more effective way to track warranties for items subject to Item Unique Identification (IUID). Presently, DoD lacks the enterprise capability that would provide visibility and accountability of warranty data
