On September 4, 2012, FFP Project 61, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project located on the Mississippi River, near Arbroth, in West Baton Rouge and East Baton Rouge Parishes, Louisiana. The proposed Point Menoir hydrokinetic project would consist of the following: (1) Up to 1,434 SmarTurbine generating units installed in arrays on the bottom of the river; (2) the total capacity of the installation would be up to 57,360 kilowatts; (3) flexible cables would convey each arrays power to a metering station; and (4) a transmission line would interconnect with the power grid. The proposed project would have an average annual generation of 130,450,000 kilowatt-hours (kWh), which would be sold to a local utility.
