ENVIRONMENTAL PROTECTION AGENCY

[FRL-9929-41-ORD]

Final Release of EPA's Report on the Environment (ROE)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing the availability of the final web-based, "Report on the Environment (ROE)" (EPA/600/R-15/142). The ROE was prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development, working in collaboration with EPA Program and Regional offices. The ROE is a comprehensive source of scientific indicators that describe the status and trends in the nation's environment and human health condition. The indicators help to answer important questions for EPA about the current status and historical trends in U.S. air, water, land, human health, and ecological condition at the national and regional levels. These indicators are based on data collected by EPA, other federal and state agencies, and non-governmental organizations and meet high standards for data quality, objectivity, and utility. The ROE reports status and trends; it does not analyze or diagnose the reasons for, and relationships between, trends in stressors and environmental and health outcomes.

The final ROE can be accessed at the following Web site: <http://www.epa.gov/roe>.

DATES: EPA released the report publicly on July 20, 2015.

ADDRESSES: The ROE is web-based and is available solely via the Internet at: <http://www.epa.gov/roe>.

FOR FURTHER INFORMATION CONTACT: For additional information concerning the ROE, contact Dr. Patricia Murphy, NCEA; telephone: 732-906-6830; facsimile: 732-452-6640; or email: murphy.patricia@epa.gov.

SUPPLEMENTARY INFORMATION:

Information About the Project/Document

EPA's Report on the Environment (ROE) is a comprehensive source of

scientific indicators that describe the status and trends in the nation's environment and human health condition. The indicators help to answer important questions for EPA about the current status and historical trends in U.S. air, water, land, human health, and ecological conditions at the national and, where possible, regional levels. These indicators are based on data collected by EPA, other federal and state agencies, and non-governmental organizations and meet high standards for data quality, objectivity, and utility. The ROE reports status and trends; it does not analyze or diagnose the reasons for, and relationships between, trends in stressors and environmental and health outcomes.

Since its earliest release in 2003, the ROE has undergone periodic updates and restructurings. The latest version features several significant changes, the most notable being that the ROE is fully online, allowing it to be more interactive and accessible. Users can customize graphics and pan and zoom on maps. For certain indicators, users can now choose to view statistical information about the data by simply clicking display options. Additionally, new indicators fill information gaps, which previously lacked reliable, long-term data. The draft ROE 2014 was released in March 2014 and was peer-reviewed by EPA's Science Advisory Board in July 2014. The final ROE can be found at: <http://www.epa.gov/roe>.

Dated: July 14, 2015.

Chris Saint,

Acting Deputy Director, National Center for Environmental Assessment.

Environmental Laboratory Advisory Board; Notice of Charter Renewal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of charter renewal.

Notice is hereby given that the Environmental Protection Agency (EPA) has determined that, in accordance with the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2, the Environmental Laboratory Advisory Board (ELAB) is a necessary committee, which is in the public interest. Accordingly, ELAB will be renewed for an additional two-year period. The purpose of the ELAB is to provide

advice and recommendations to the Administrator of EPA on issues associated with enhancing EPA's measurement programs and the systems and standards of environmental accreditation. Inquiries may be directed to Lara P. Phelps, Designated Federal Officer, U.S. Environmental Protection Agency, Office of the Science Advisor, 109 T.W. Alexander Drive (E243-05), Research Triangle Park, NC 27709 or by email: phelps.lara@epa.gov.

Dated: June 1, 2015.

Thomas A. Burke,

EPA Science Advisor, Office of Research and Development.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0139]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the

PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before September 22, 2015. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0139.

Title: Application for Antenna Structure Registration.

Form Number: FCC Form 854.

Type of Review: Revision of a currently approved collection.

Respondents: Individuals or households, business or other for-profit entities, not-for-profit institutions, and State, local, or Tribal governments.

Number of Respondents and Responses: 2,400 respondents; 57,100 responses.

Estimated Time per Response: .33 hours to 2.5 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement and third party disclosure reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1, 2, 4(i), 303, and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 303, and 309(j), section 102(C) of the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4332(C), and section 1506.6 of the regulations of the Council on Environmental Quality, 40 CFR 1506.6.

Total Annual Burden: 25,682 hours.

Total Annual Cost: \$1,176,813.

Privacy Act Impact Assessment: Yes. This information collection contains personally identifiable information on individuals which is subject to the Privacy Act of 1974. Information on the FCC Form 854 is maintained in the Commission's System of Records, FCC/WTB-1, "Wireless Services Licensing Records." These licensee records are publicly available and routinely used in accordance of subsection b of the Privacy Act, 5 U.S.C. 552a(b), as amended. Taxpayer Identification Numbers (TINs) and materials that are afforded confidential treatment pursuant to a request made under 47 CFR 0.459 of the Commission's rules

will not be available for public inspection.

Nature and Extent of Confidentiality: Respondents may request materials or information submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of the Commission's rules.

The Commission has in place the following policy and procedures for records retention and disposal: Records will be actively maintained as long as the entity remains a tower owner. Paper records will be archived after being keyed or scanned into the Antenna Structure Registration (ASR) database and destroyed when twelve (12) years old.

Needs and Uses: As discussed below, the Commission is revising the FCC Form 854 to implement measures adopted in a recent Report and Order, and is seeking Office of Management and Budget (OMB) approval for this information collection as revised. The Commission is also reporting a change in the annual burden and annual cost due to a small increase in the number of responses. After the comment period, the Commission will submit the revised information collection to OMB to obtain the full three year clearance.

The purpose of the FCC Form 854 is to register antenna structures (radio towers) that are used for communication services regulated by the Commission; to make changes to existing antenna structure registrations or pending applications for registration; or to notify the Commission of the completion of construction or dismantlement of such structures, as required by Title 47 of the Code of Federal Regulations (CFR), chapter 1. In addition, for proposed new antenna structures, the FCC Form 854 is used to facilitate a pre-application public notification process, including a required 30-day period of local and national notice to provide members of the public with a meaningful opportunity to comment on the environmental effects of proposed antenna structures that require registration with the Commission.

The Commission is revising this current information collection due to the adoption of a Report and Order, FCC 14-117, which streamlined and eliminated outdated provisions of the Commission's part 17 rules governing the construction, marking, and lighting of antenna structures. The changes to this collection are necessary to implement two of the updates adopted in the Report and Order. The first change, to section 17.4(j), requires owners of certain antenna structures to file FCC Form 854 with the Commission if there is any change or correction in

the overall height of one foot or greater or in the coordinates of one second or greater in longitude or latitude of a registered antenna structure. The second change, to section 17.4(b), requires owners to note on FCC Form 854 that the registration is voluntary, if the antenna structure is otherwise not required to be registered under section 17.4.

As a result, there will be a small increase in the number of FCC Form 854s filed each year, as well as an additional question added to the form itself which will permit qualified applicants to indicate that they are voluntarily registering their antenna structures. These changes will enable the Commission to further modernize its rules while adhering to its statutory responsibility to prevent antenna structures from being hazards to air navigation.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.
