SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1084.

Title: Rules and Regulations Implementing Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers (CARE).

Form Number: N/A.

Type of Review: Revision to a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 1,778.

Estimated Time per Response: 0.75 to 6.70 hours.

Frequency of Response:

Recordkeeping; Annual reporting requirements.

Total Annual Burden: 44,576 hours.

Total Annual Cost: None.

Privacy Impact Assessment: No impact(s).

Needs and Uses: In addition to the existing information collection requirements that were previously approved by OMB, in the *Order on Reconsideration*, In the Matter of Rules and Regulations Implementing Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers (2005 Report and Order), CG Docket No. 02-386, FCC 06-134, which was released on September 13, 2006, the Commission concluded that minor modifications to 47 CFR 64.4002 are needed to clarify carriers' respective obligations under that rule section.

Paragraph 64.4002(d) is modified to require that a LEC notify an IXC when the LEC has removed at its local switch a presubscribed customer of the IXC in connection with the customer's selection of "no-PIC" status. In this context, the selection of "no-PIC" status by the customer refers to the selection of no carrier for interLATA service or no carrier for intraLATA service. The Commission concludes that this modification is needed to ensure that an IXC does not continue billing a customer for non-usage-related monthly

charges where that customer has contacted his current LEC or his current IXC to select "no-PIC" status.

Paragraph 64.4002(e) of the Commission's rules is modified to include the effective date of any changes to a customer's local service account and the carrier identification code of the customer's IXC among the categories of information that must be provided to the IXC by the LEC. The Commission concludes that knowing the effective date of account changes will help IXCs to maintain accurate customer account information and that including the carrier identification code of the customer's IXC will enable an IXC to verify that it is the proper recipient of the transmitted information.

Paragraph 64.4002(g) of the Commission's rules is modified to make the information categories included in paragraph 64.4002(g) consistent with those included in other LEC notification requirements. Paragraph 64.4002(g) also is modified to require that when a customer changes LECs, but wishes to retain his current PIC, the new LEC must so notify the current PIC so that the current PIC does not erroneously assume, absent additional notification from the new LEC, that the customer also wishes to cancel his current PIC.

Title: Operator: Section 73.213, Grandfathered Short-Spaced Stations.
Form Number: Not applicable.
Type of Review: Extension of a currently approved collection.
Respondents: Business or other for-profit entities.
Number of Respondents: 15.
Estimated Time per Response: 0.5 hours—0.83 hours.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement.

Total Annual Burden: 20 hours.
Total Annual Cost: \$2,250.
Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 73.213 requires licensees of grandfathered short-spaced FM stations seeking to modify or relocate their stations to provide a showing demonstrating that there is no increase in either the total predicted interference area or the associated population (caused or received) with respect to all grandfathered stations or increase the interference caused to any individual

stations. Applicants must demonstrate that any new area predicted to lose service as a result of interference has adequate service remaining. In addition, licensees are required to serve a copy of any application for co-channel or first-adjacent channel stations proposing predicted interference caused in any area where interference is not currently predicted to be caused upon the licensee(s) of the affected short-spaced station(s). Commission staff use the data to determine if the public interest will be served and that existing levels of interference will not be increased to other licensed stations. Providing copies of application(s) to affected licensee(s) will enable potentially affected parties to examine the proposals and provide them an opportunity to file informal objections against such applications.
