A. Overview of Information Collection

Title of Information Collection: Evaluation of Cohort 1 of the Moving to Work Demonstration Program Expansion.

OMB Approval Number: 2528-New.

Type of Request: New.

Form Number: N/A.

Description of the need for the information and proposed use: The Office of Policy Development and Research (PD&R), at the U.S. Department of Housing and Urban Development (HUD), is proposing the collection of information for the Evaluation of Cohort 1 of the Moving to Work Demonstration Program Expansion.

Moving to Work (MTW) is a demonstration program that encourages public housing agencies (PHAs) to test ways to achieve three specific objectives: (1) Increase the cost effectiveness of federal housing programs, (2) increase housing choice for low-income families, and/or (3) encourage greater self-sufficiency of households receiving housing assistance. MTW designation gives PHAs relief from many of the regulations and statutory provisions that apply to the public housing and Housing Choice Voucher (HCV) programs. MTW agencies can also merge their public housing and HCV funds into a single block grant and use these funds (if desired) for local activities outside of the typical public housing and HCV programs, such as providing supportive services or developing housing for populations with special needs. In 2016, Congress authorized HUD to expand the MTW program by 100 high performing PHAs.

The MTW expansion statute emphasizes evaluating the MTW program, directing HUD to expand the program in cohorts that would allow for “one specific policy change to be implemented. . . .” and rigorously evaluated. The first cohort of the expansion will test the impact of MTW designation on small PHAs, defined for these purposes as PHAs administering

no more than 1,000 housing units across their HCV and public housing programs. In Cohort 1, PHAs are free to implement any program and policy changes permissible under the MTW program. Under contract with HUD’s Office of Policy Development and Research, Abt Associates Inc. will conduct an evaluation of Cohort 1 that includes a study of how PHAs use their MTW flexibility to meet the MTW program’s goals and a study of the impact of MTW designation on cost effectiveness, self-sufficiency, and housing choice.

The Evaluation of Cohort 1 of the Moving to Work Demonstration Program Expansion will be implemented as a randomized control trial. To carry out the study, HUD randomly assigned the 43 eligible PHAs that submitted a Letter of Interest to HUD for Cohort 1 into one of two groups: A treatment group (33 PHAs) that is invited to complete the application for MTW designation and a control group (10 PHAs) that is not invited to complete the application for MTW designation and therefore is not permitted to receive MTW designation under Cohort 1.

The evaluation will compare the outcomes of the treatment group PHAs to the outcomes of the control group PHAs over a five-year period. To the extent possible, this evaluation will rely on analysis of secondary data that PHAs already prepare and submit to HUD, however, some primary data collection will be required.

This **Federal Register** Notice provides an opportunity to comment on the information collection for the evaluation. The evaluation will use the data described in this information collection request to clarify and expand on information provided in the existing data sources and to capture qualitative information about the experiences of study PHAs implementing activities related to cost effectiveness, self-sufficiency, or housing choice without MTW flexibility. The proposed information collection consists of: (1) Interviews with MTW (treatment group) PHAs; (2) online surveys to non-MTW (control group) PHAs; and (3) interviews with non-MTW (control group) PHAs.

ANNUALIZED BURDEN TABLE

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Cost
Interviews with MTW (Treatment Group) PHAs	99.00	1	99.00	1.00	99.00	\$52.14	\$5,161.86
Online Surveys to Non-MTW (Control Group) PHAs	10.00	1	10.00	0.50	5.00	52.14	260.70

ANNUALIZED BURDEN TABLE—Continued

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Cost
Interviews with Non-MTW (Control Group) PHAs	20.00	1	20.00	1.00	20.00	52.14	1,042.80
Total	129.00	124.00	6,465.36

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Anna P. Guido,

*Department Reports Management Officer,
Office of the Chief Information Officer.*

A. Overview of Information Collection

Title of Information Collection: 2021 American Housing Survey.

OMB Approval Number: 2528-0017.

Type of Request: Revision of currently approved collection.

Form Number: N/A.

Description of the need for the information and proposed use: The purpose of the American Housing Survey (AHS) is to supply the public with detailed and timely information about housing quality, housing costs,

and neighborhood assets, in support of effective housing policy, programs, and markets. Title 12, United States Code, Sections 1701Z-1, 1701Z-2(g), and 1710Z-10a mandates the collection of this information.

Like the previous surveys, the 2021 AHS will collect “core” data on subjects, such as the amount and types of changes in the housing inventory, the physical condition of the housing inventory, the characteristics of the occupants, housing costs for owners and renters, including a redesigned mortgage section, the persons eligible for and beneficiaries of assisted housing, remodeling and repair frequency, reasons for moving, the number and characteristics of vacancies, and characteristics of resident’s neighborhood. In addition to the “core” data, HUD plans to collect supplemental data on the renter housing search process, intent to move, housing characteristics that increase wildfire risk, household pets, delinquent payments and notices for mortgage, rent, or utility bills, and smoking.

In 2015, the AHS began a new longitudinal panel. The sample design has two components: an integrated longitudinal national sample, and an independent metropolitan areas longitudinal sample. The integrated longitudinal national sample includes three parts: (1) 35,731 national cases representative of the US and 9 Census Divisions outside the top 15 metropolitan areas; (2) 12,060 HUD-assisted oversample cases; and (3) 47,175 sample cases of the top 15 metropolitan areas in the US. The total integrated longitudinal national sample for 2021 will consist of 94,966 housing units. In addition to the integrated national longitudinal sample, HUD plans to conduct 10 additional metropolitan area longitudinal samples, each with approximately 3,000 housing units (for a total 30,000 metropolitan area housing units). The 10 additional metropolitan area longitudinal samples were last surveyed in 2017.

To help reduce respondent burden on households in the longitudinal sample, the 2021 AHS will make use of dependent interviewing techniques,
