SUPPLEMENTARY INFORMATION:

Title: Credit Account Approval for Reimbursable Services.

OMB Number: 0579-0055.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) provides the services of a Federal inspector to clear imported and exported agricultural commodities for animal and plant health purposes. These services are paid for by user fees during regular working hours. If an importer wishes to have shipments cleared at other hours, such services will usually be provided on a reimbursable overtime basis, unless already covered by a user fee. Exporters wishing cargo to be certified during nonworking hours may also utilize this procedure.

Many importers and exporters who require inspection services are repeat customers who request that APHIS bill

them. The Agency needs to collect certain information to conduct a credit check on prospective applicants to ensure creditworthiness prior to extending credit services and to prepare billings. Also, the Debt Collection Improvement Act of 1996, as amended (31 U.S.C. 3332), requires that agencies collect tax identification numbers from all persons doing business with the Government for purposes of collecting delinquent debts. APHIS Form 192 (Application for Credit Account) is used to collect this information and must be completed before credit is extended.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: Importers, exporters, or brokers who wish to set up an account for billing of inspection services provided during nonworking hours.

Estimated annual number of respondents: 225.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 225.

Estimated total annual burden on respondents: 56 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of August 2013.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Swine Health Protection.

OMB Number: 0579-0065.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to prohibit or restrict the interstate movement of animals and animal products to prevent the dissemination within the United States of animal diseases and pests of livestock and to conduct programs to detect, control, and eradicate pests and disease of livestock.

The Swine Health Protection Act (the Act) prohibits the feeding of garbage to swine intended for interstate movement or foreign commerce or that substantially affect such commerce unless the garbage has been treated to kill disease organisms. Untreated garbage is one of the primary media through which numerous infectious and communicable diseases can be transmitted to swine. APHIS' regulations promulgated under the Act, which are located at 9 CFR part 166, require that garbage intended to be fed to swine must be treated at a facility that holds a valid permit to treat the garbage and must be treated in accordance with the regulations.

APHIS requires certain information in order to license (issue a permit to) a facility to operate and to monitor the facility for compliance with the regulations. APHIS collects this information from applications for a license to operate a garbage treatment facility, records of the destination and date of removal of all food waste or garbage from the treatment facility, and food waste reports. With this information, APHIS is able to carefully monitor garbage treatment facilities to ensure that they are meeting the requirements. In addition, other required information collection activities, include acknowledgement of receipt of the Act and regulations by applicants, request for cancellation of a license, notification of illness or death of animals, request for hearing, and inspection. The information provided by the combined activities is critical in preventing the interstate spread of various swine diseases and, therefore, plays a vital role in our swine health protection program.

We are asking the Office of Management and Budget (OMB) to

approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.88 hours per response.

Respondents: Owners/operators (licensees) of garbage treatment facilities, herd owners, food establishments, and State animal health authorities.

Estimated annual number of respondents: 2,110.

Estimated annual number of responses per respondent: 6.

Estimated annual number of responses: 12,897.

Estimated total annual burden on respondents: 11,333 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of August 2013.
