ENVIRONMENTAL PROTECTION AGENCY**[CAXXX-NOA; FRL-8517-9]****Official Release of EMFAC2007 Motor Vehicle Emission Factor Model for Use in the State of California**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability.

SUMMARY: EPA is approving and announcing the availability of the latest version of the California EMFAC model for use in state implementation plan (SIP) development in California. EMFAC2007 is the latest update to the EMFAC model for use by California state and local governments to meet Clean Air Act (CAA) requirements. The new model, which is based on new and improved data, calculates air pollution emission factors for passenger cars, trucks, motorcycles, motor homes and buses. Today's notice also sets the date after which EMFAC2007 is required to be used statewide in all new regional emissions analyses and carbon monoxide (CO) hot-spot analyses for transportation conformity determinations in California. EPA also intends to approve EMFAC2007 in the future for particulate matter (PM₁₀ and PM_{2.5}) hot-spot analyses in California, once EPA issues quantitative hot-spot modeling guidance for such analyses. Since the EMFAC model is used only in California, EPA's approval of the model does not affect MOBILE model users in other states.

DATES: This determination is effective *January 18, 2008*. EMFAC2007 must be used for all new regional emissions
