SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Knowledge, attitudes, and practices on Coronavirus Disease of 2019 (COVID–19) vaccination among service members and medical beneficiaries; OMB Control Number 0720–VACC.

Needs and Uses: Although a safe and effective vaccine against COVID–19 is available and approved by the United States Food and Drug Administration, there is no guarantee that people who would benefit from the vaccine will agree to take it. Vaccine hesitancy, the concern about vaccination of oneself or of one's children, has been increasing in the U.S. and could present a barrier to widespread vaccination against COVID–19. COVID–19, the disease caused by severe acute respiratory syndrome coronavirus 2, has an adverse effect on combat readiness. The proposed project aims to assist the DoD in ongoing service-wide COVID–19 vaccination program through surveying the knowledge, attitudes, and practices of a population of service members and medical beneficiaries at a large military base in the United States: Joint Base Lewis McChord (JBLM) in Washington state. The project will leverage existing partnerships between medical and public health personnel at Madigan Army Medical Center, the Military HIV Research Program at Walter Reed Army Institute of Research, and the Henry M. Jackson Foundation to rapidly implement and complete the project. The study population will be active-duty personnel and medical beneficiaries of the Military Health System aged 18 and over at JBLM.
