

identifies substantive actions needed to achieve recovery by addressing the threats to the species. The strategy for recovery includes a linkage between management actions and an active research and monitoring program intended to fill data gaps and assess effectiveness. The Final Recovery Plan incorporates an adaptive management framework by which management actions and other elements will evolve and adapt as we gain information through research and monitoring. The Final Recovery Plan references many of the significant efforts already underway to allow Chinook salmon and steelhead in the Central Valley to access a diversity of high quality habitats that have been lost or degraded due to human land use.

We expect the Final Recovery Plan to help us and other Federal agencies take a consistent approach to section 7 consultations under the ESA and to other ESA decisions. For example, the Final Recovery Plan will provide information on the biological context for the effects that a proposed action may have on the listed ESU. The best available information in the Final Recovery Plan on the natural history, threats, actions, and priorities for recovery can be used to help assess risks. Consistent with the adoption of this Final Recovery Plan for winter-run Chinook salmon, spring-run Chinook salmon, and steelhead, we will implement relevant actions for which we have authority, work cooperatively on implementation of other actions, and encourage other Federal and state agencies to implement recovery actions for which they have responsibility and authority.

Recovery of winter-run Chinook salmon, spring-run Chinook salmon, and steelhead will require a long-term effort throughout the Central Valley and surrounding watersheds in cooperation and coordination with Federal, state, tribal and local government agencies, and the community.

Conclusion

NMFS has reviewed the Plan for compliance with the requirements of the ESA section 4(f), determined that it does incorporate the required elements and is therefore adopting it as the Final Recovery Plan for the Sacramento River winter-run Chinook salmon ESU, the Central Valley spring-run Chinook salmon ESU, and the Central Valley steelhead DPS.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: July 11, 2014.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Highly Migratory Species Management Team (HMSMT) will hold a meeting, which is open to the public.

DATES: The HMSMT will meet Tuesday, August 12 to Thursday, August 14, 2014. This meeting will start at 8:30 a.m. and continue until business is concluded on each day.

ADDRESSES:

Meeting address: The meeting will be held at the following locations:

August 12, Pacific Room, Southwest Fisheries Science Center, 8901 La Jolla Shores Dr., La Jolla, CA 92037-1509;

August 13, T-29 Martin Johnson House, Scripps Institute of Oceanography, 8840 Biological Grade, La Jolla, CA 92037;

August 14, Stenella Room, Southwest Fisheries Science Center, 8901 La Jolla Shores Dr., La Jolla, CA 92037-1509.

Council address: Pacific Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Dr. Kit Dahl, Pacific Council; telephone: (503) 820-2280.

SUPPLEMENTARY INFORMATION: The HMSMT will discuss the development of alternatives and analyses for issues to be addressed as part of the HMS biennial harvest specifications and management measures process. The Pacific Council identified six topics to potentially address through the biennial process (see the June 2014 Decision Summary Document at www.pcouncil.org for a complete list). The Pacific Council assigned highest priority to reducing recreational catch of Pacific bluefin tuna and identifying take caps ("hard caps") for selected

protected species (marine mammals and sea turtles) for the California drift gillnet fishery. The HMSMT will also discuss the exempted fishing permit (EFP) review process, which is scheduled for the September and November Pacific Council meetings. EFP proposals have been solicited with a deadline of August 15. Finally, the HMSMT will discuss completion of the 2014 HMS Stock Assessment and Fishery Evaluation (SAFE) document. The HMSMT will report on their work at the September 12-17, 2014, Pacific Council meeting in Spokane, WA.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2280 at least 5 days prior to the meeting date.

Dated: July 17, 2014.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
