

entities who are legally fit to obtain a license do so. In order to integrate this process with CLCSS, CRSRA will turn the standard verification requirement into a form. There will be no substantive change in what information needs to be provided by licensees.

CRSRA will renew the optional Initial Contact Form (ICF) that includes contact information and general remote sensing system information with a few changes for clarity that include rephrasing a few questions and removing one or two. The ICF may be submitted electronically through the NOAA website prior to the submission of a full application and will also be integrated into CLCSS. The ICF information received is used to determine if the applicant is required to submit a full application for the issuance of a license to operate a private remote sensing space system, *i.e.*, the proposed system falls under the authority defined in the Act and the regulations. If NOAA determines after reviewing the ICF that an application is not required, the potential applicant will save 40–50 hours of paperwork by not submitting the application.

Finally, CRSRA is renewing the optional Data Availability Notification (DAN) which includes contact information and general data availability information. The DAN may be submitted electronically through the NOAA website during the application process, while an applicant holds a license, or by any interested party. The DAN will be integrated with CLCSS as well. The DAN information received is used to help determine the availability of unenhanced data from a foreign or domestic remote sensing system, which may then be compared to unenhanced data produced by an applicant's system for the purpose of adjusting the conditions and/or restrictions in a license. The DAN form ensures that only required information is submitted, thereby reducing unnecessary paperwork and/or follow-up correspondence.

Affected Public: Business or other for-profit organizations.

Frequency: Once per year.

Respondent's Obligation: Voluntary.

Legal Authority: Land Remote Sensing Policy Act of 1992, 51 U.S.C. 60101 *et seq.*; and 15 CFR part 960—Licensing of Private Remote Sensing Space Systems..

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the

publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0174.

Sheleen Dumas,

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE950]

Fisheries of the Gulf of America and South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 94 Data Workshop for Florida Hogfish.

SUMMARY: The SEDAR 94 assessment process of Florida hogfish will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 94 Data Workshop will be held from 1 p.m. on July 28, 2025, until 1 p.m. on August 1, 2025. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from or completed prior to the time established by this notice.

ADDRESSES:

Meeting address: The SEDAR 94 Data Workshop will be held at the Hilton St. Petersburg Bayfront, 333 1st Street South, St. Petersburg, FL 33701.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366. Email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with the National Marine Fisheries Service and the Atlantic and Gulf States Marine Fisheries Commissions have

implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data and Assessment Workshops is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf, South Atlantic, and Caribbean Fishery Management Councils and National Marine Fisheries Service Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Data Workshop are as follows:

An assessment data set and associated documentation will be developed during the workshop. Participants will evaluate proposed data and select appropriate sources for providing information on topics such as life history characteristics, catch statistics, discard estimates, length and age composition, and fishery dependent and fishery independent measures of stock abundance.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 12, 2025.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Socioeconomics of Coral Reef Conservation, South Florida 2026 Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. This notice pertains to an individual survey under the approved collection of information for Socioeconomics of Coral Reef Conservation. Public comments were previously requested via the **Federal Register** on January 5, 2024 during a 60-day comment period and on April 15, 2024, during an additional 30-day comment period. This notice allows for an additional 30 days for public comments with respect to the South Florida survey.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: Socioeconomics of Coral Reef Conservation, South Florida 2026 Survey.

OMB Control Number: 0648–0646.

Form Number(s): None.

Type of Request: Regular [Revision of an approved information collection].

Number of Respondents: 2,000.

Average Hours per Response: 20 minutes.

Total Annual Burden Hours: 667 hours.

Needs and Uses: This request is for a revision and extension to the currently approved collection of information, OMB Control Number 0648–0646, under

the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and implementing regulations at 5 CFR part 1320. This previously approved information collection assists NOAA in the administration of the National Coral Reef Monitoring Program (NCRMP), which was established by the NOAA Coral Reef Conservation Program (CRCP) under the authority of the Coral Reef Conservation Act of 2000, 16 U.S.C. 6401 *et seq.* This act authorizes CRCP to, among other things, conserve and restore the condition of United States coral reef ecosystems and enhance public awareness, understanding, and appreciation of coral reefs and coral reef ecosystems and their ecological and socioeconomic value. In accordance with its mission goals, NOAA developed a survey to track relevant information regarding each jurisdiction's population, social and economic structure, the benefits of coral reefs and related habitats, the impacts of society on coral reefs, and the impacts of coral management on communities. The survey is repeated in each jurisdiction every five to seven years in order to provide longitudinal data and information for managers to effectively conserve coral reefs for current and future generations.

The purpose of this information collection is to obtain human dimensions information from residents in South Florida. Specifically, NOAA is seeking information on behaviors and activities related to coral reefs, as well as information on perceptions of coral reef conditions and attitudes toward specific reef conservation activities. The survey has a core set of questions that are asked across all jurisdictions to allow for information to be tracked over time and across jurisdictions. To account for geographical, cultural and linguistic differences between jurisdictions, the survey questions include items that are specific to the local context and developed based on jurisdictional partner feedback.

We intend to use the information collected through this instrument for research purposes, as well as for measuring and improving the results of our reef protection programs. Because many of our efforts to protect reefs rely on education and changing attitudes toward reef protection, the information collected will allow CRCP to ensure that programs are designed appropriately at the start, future program evaluation efforts are as successful as possible, and outreach efforts are targeting the intended recipients with useful information.

Affected Public: Individuals or households.

Frequency: Every 5–7 years.

Respondent's Obligation: Voluntary.

Legal Authority: Coral Reef Conservation Act of 2000.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0646.

Unified Facilities Criteria Revision Impacting Variable Refrigerant Flow Systems

AGENCY: Under Secretary of Defense for Acquisition & Sustainment, Department of Defense (DoD).

ACTION: Notification of revision to Unified Facilities Criteria (UFC) regarding the use of variable refrigerant flow (VRF) systems.

SUMMARY: The DoD is proposing an update regarding the use of VRF systems in the UFC requiring notification pursuant to the National Defense Authorization Act for Fiscal Year 2022, REVISIONS TO UNIFIED FACILITIES CRITERIA REGARDING USE OF VARIABLE REFRIGERANT FLOW SYSTEMS. The updates include UFC regarding Mechanical Engineering; Heating, Ventilation, and Air-Conditioning; Youth Centers; Child Development Centers; Continuous Child Care Facilities.

DATES: Comments are due by August 15, 2025.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:
