Clean Air Act Approval of Operating Permits Program Revision; District of Columbia

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to maintain full approval of the title V operating permit program of the District of Columbia. In a notice of deficiency (NOD) published in the **Federal Register** on December 21, 2001 (66 FR 65947), EPA notified the District of Columbia of EPA's finding that the District's provisions for providing public notification of permitting actions did not fully comply with the requirements of the Clean Air Act (CAA) and its implementing regulations. On April 4, 2003, the District of Columbia submitted revisions to the public notification requirements of the operating permit program. The program revision adequately resolves the deficiency identified in the NOD and the District of Columbia maintains final full approval of the Clean Air Act title V operating permit program and this action proposes to approve the amendment. In the Final Rules section of this **Federal Register**, EPA is approving the District's operating permit program as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct
