#### **SUPPLEMENTARY INFORMATION:**

#### **I. Introduction**

The NRC (the Commission) is  
considering issuance of an amendment  
to Early Site Permit (ESP) number ESP-  
003, issued to Virginia Electric and  
Power Company doing business as  
Dominion Virginia Power, and Old  
Dominion Electric Cooperative for the  
North Anna site located near Louisa,  
Virginia.

The proposed amendment would  
delete ESP permit condition 3.G, which  
prescribes the notification conditions  
associated with the implementation of

certain activities authorized by the  
permit. Specifically, permit condition  
3.G requires the permit holder to notify  
the NRC Regional Administrator for  
Region II and the operator of North  
Anna Power Station at least 120 days  
before the commencement of certain  
activities described in Appendix E of  
the permit, the Site Redress Plan.  
Condition 3.G also states that the permit  
holder will certify in the notification  
that it has obtained all other permits,  
licenses, and certifications required for  
those activities. The proposed  
amendment eliminates the notifications  
by deleting the condition in its entirety.

Before issuance of the proposed  
license amendment, the Commission  
will have made findings required by the  
Atomic Energy Act of 1954, as amended  
(the Act) and the Commission's  
regulations.

The Commission has made a  
proposed determination that the  
amendment request involves no  
significant hazards consideration. Under  
the Commission's regulations in Title 10  
of the Code of Federal Regulations,  
Section 50.92, this means that  
performance of site preparation and  
preliminary construction activities  
described in site redress plan at the  
North Anna ESP site in accordance with  
the proposed amendment would not  
(1) Involve a significant increase in the  
probability or consequences of an  
accident previously evaluated; (2) create  
the possibility of a new or different kind  
of accident from any accident  
previously evaluated; or (3) involve a  
significant reduction in a margin of  
safety.

As required by 10 CFR 50.91(a), the  
applicant has provided its analysis of  
the issue of no significant hazards  
consideration, which is presented  
below:

1. Does the proposed amendment involve  
a significant increase in the probability or  
consequences of an accident previously  
evaluated?

*Response:* No.

The proposed amendment deletes ESP  
condition 3.G, which prescribes the  
notification conditions associated with the  
implementation of activities authorized by  
the permit. This change is administrative in  
nature and does not affect the fabrication,  
construction, or operation of any plant  
structure, system, or component.

Therefore, the proposed ESP change does  
not involve a significant increase in the  
probability or consequences of an accident  
previously evaluated.

2. Does the proposed amendment create  
the possibility of a new or different kind of  
accident from any accident previously  
evaluated?

*Response:* No.

The proposed amendment deletes ESP  
condition 3.G, which prescribes the
