

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection: Identifying Experts in Prevention Science Methods to Include on NIH Review Panels, OMB# 0925-0728—REVISION, exp. 11/30/2020, Office of Disease Prevention (ODP), National Institutes of Health (NIH).

Need and Use of Information Collection: The Office of Disease Prevention (ODP) is the lead Office at the National Institutes of Health (NIH) responsible for assessing, facilitating, and stimulating research in disease prevention and health promotion, and disseminating the results of this research to improve public health. Prevention is preferable to treatment, and research on disease prevention is an important part of the NIH's mission. The knowledge gained from this research

leads to stronger clinical practice, health policy, and community health programs. ODP collaborates with NIH, other Department of Health and Human Services (HHS) agencies, and other public and private partners to achieve the Office's mission and goals. One of ODP's priorities is to promote the use of the best available methods in prevention research and support the development of better study designs and research methods. One of our strategies is to help NIH Institutes, Centers, and Offices identify experts in prevention science methods to include on their peer review panels. This strengthens the panels and improves the quality of the prevention-related research supported by NIH. To identify experts in prevention science methods, we have developed online software that allows us to collect scientists' names, contact information, and resumes, as well as to have those scientists identify their level of expertise in a variety of prevention science methods and content areas. The data are used to populate a web-based tool that NIH staff can use to identify

scientists with prevention-related research expertise in specific research methods and study designs for invitation to serve as a reviewer on an NIH study section. This system is also shared with review staff from other HHS agencies, to use in the same way. This OMB revision request is for the continued collection of existing data and to update the Prevention Research Expertise Survey (PRES) tool in order to capture areas of expertise not previously collected in the current survey, including additional study design topics, research methods, content topics, and settings in which the respondent's research is performed. The revised PRES also simplifies a question about the respondent's previous NIH review experience and asks researchers who have already completed previous versions of the survey to update their information based on the revised topics.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 417.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hour
New Investigators	600	1	25/60	250
Returning Investigators (to update information)	1,000	1	10/60	167
Total	1,600	417

Dated: October 19, 2020.

Lawrence A. Tabak,

Principal Deputy Director, National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Aging; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material,

and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Aging Special Emphasis Panel; Prodromal synucleinopathies—Part 1.

Date: November 3, 2020.

Time: 11:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Birgit Neuhuber, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, National Institutes of Health, 7201 Wisconsin Avenue, Gateway Building, Suite 2W200, Bethesda, MD 20892, (301) 480-1266, neuhuber@ninds.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

Name of Committee: National Institute on Aging Special Emphasis Panel; Prodromal synucleinopathies—Part 2.

Date: November 9, 2020.

Time: 11:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Birgit Neuhuber, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, National Institutes of Health, 7201 Wisconsin Avenue, Gateway Building, Suite 2W200, Bethesda, MD 20892, (301) 480-1266, neuhuber@ninds.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

(Catalogue of Federal Domestic Assistance Program Nos. 93.866, Aging Research, National Institutes of Health, HHS)

Dated: October 20, 2020.

Miguelina Perez,

Program Analyst, Office of Federal Advisory Committee Policy.
