## DEPARTMENT OF AGRICULTURE

### Submission for OMB Review; Comment Request

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13 on or after the date of publication of this notice. Comments are requested regarding: (1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding these information collections are best assured of having their full effect if received by May 31, 2022. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to

the collection of information unless it displays a currently valid OMB control number.

### National Agricultural Statistics Service (NASS)

*Title:* Agricultural Resource Management and Chemical Use Surveys—Substantive Change.

*OMB Control Number:* 0535–0218.

*Summary of Collection:* General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204 which specifies that “The Secretary of Agriculture shall procure and preserve all information concerning agriculture which he can obtain . . . by the collection of statistics . . .”. The primary objective of the National Agricultural Statistics Service (NASS) is to provide data users with timely and reliable agricultural production and economic statistics, as well as environmental and specialty agricultural related statistics. To accomplish this objective, NASS relies on the use of diverse surveys that show changes within the farming industry over time.

The National Agricultural Statistics Service (NASS) is requesting a substantive change to the ARMS and Chemical Use Survey information collection request (OMB No. 0535–0218) for the 2022 ARMS Phase 1 (Screening Survey), ARMS Phase 2, Chemical Use, and ARMS Phase 3 (Costs and Returns Survey). The change is needed for two purposes:

- Announce target commodities for the 2022 cycle, and
- To collect data from additional historically underserved farm producer groups.

The target commodities for the 2022 cycle are: Wheat (winter, Durum, and other spring wheat), potatoes, and vegetable chemical use. Collecting data from additional historically underserved farm producer groups is in response to the Biden Administration's top priority of advancing equity for all Americans.

The changes to these surveys will increase burden hours by 7,035 for a new total of 127,863 hours for this information collection request.

*Need and Use of the Information:* USDA's Economic Research Service will likely incorporate the data in their standard publications which will adhere to their normal publication schedules. In addition, ERS has the expectation that the data will be used to generate

additional reports, bulletins, and journal articles.

*Description of Respondents:* Farms and Ranches.

*Number of Respondents:* 131,930.

*Frequency of Responses:* Reporting: Less than five times per year.

*Total Burden Hours:* 127,863.

Dated: April 26, 2022.

Levi Harrell,

Departmental Information Collection Clearance Officer.

**SUPPLEMENTARY INFORMATION:**

*Title:* Restricted, Prohibited, and Controlled Importation of Animal and Poultry Products and Byproducts Into the United States.

*OMB Control Number:* 0579-0015.

*Type of Request:* Revision to and extension of approval of an information collection.

*Abstract:* The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The AHPA gives the Secretary of the U.S. Department of Agriculture (USDA) broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease.

Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing USDA's Animal and Plant Health Inspection Service's (APHIS') ability to compete globally in animal and animal product and byproduct trade. In connection with this mission, APHIS enforces regulations regarding

both the importation of controlled materials and the prevention of foreign animal disease incursions into the United States. These regulations are located in 9 CFR parts 94, 95, and 122.

APHIS engages in a number of information collection activities to prevent or control the spread of livestock diseases via the restricted, prohibited, and controlled importation of animal and poultry products and byproducts into the United States, including, but not limited to, certificates, applications, agreements, appeals and cancellations of agreements, placards and statements, permissions to import, notifications, government seals, and marking requirements.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public burden for this collection of information is estimated to average 1.76 hours per response.

*Respondents:* Importers, exporters, processing operators, foreign federal governments, foreign veterinarians, port personnel, museums, educational institutions, transportation operators, and carrier personnel.

*Estimated annual number of respondents:* 30,838.

*Estimated annual number of responses per respondent:* 2.

*Estimated annual number of responses:* 64,197.

*Estimated total annual burden on respondents:* 112,219 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual

number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 26th day of April 2022.

**Anthony Shea,**

*Administrator, Animal and Plant Health Inspection Service.*
