SUPPLEMENTARY INFORMATION:**I. Background**

This is a request for the Department of Labor, Employment and Training Administration's (ETA) to extend the reporting and recordkeeping requirements of the YouthBuild (YB) program. This reporting structure features standardized data collection for program participants through quarterly Management Information System (MIS) performance reports and Work Site

Description and Housing Census report formats. All data collection and reporting is done by YouthBuild grantees.

The quarterly performance report (ETA-9136) includes aggregate and participant-level information on demographic characteristics, types of services received, placements, outcomes, and follow-up status. Specifically, these reports collect data on individuals who receive education, occupational skill training, leadership development services, and other services essential to preparing at-risk youth for in-demand occupations through YouthBuild programs. There are no changes proposed for ETA-9136 in this information collection request package. The Work Site Description and Housing Census (ETA-9143) requests information on the proposed work sites for low-income or homeless individual or families on which YouthBuild participants will be trained and participate in construction skills activities. This form also requests annual information on the number of houses or apartments that were built or

renovated each year and allows ETA to demonstrate on an annual basis the increase in affordable housing units supported by YouthBuild.

The accuracy, reliability, and comparability of program reports submitted by grantees using federal funds are fundamental elements of good public administration and are necessary tools for maintaining and demonstrating system integrity. The use of a standard set of data elements, definitions, and specifications at all levels of the workforce system helps improve the quality of performance information that is received by ETA.
