

other defects be tagged immediately with “Dangerous: Do Not Use” or similar language and removed from service until “repaired . . . or replaced.” The information will alert employers and workers that the ladder is not safe and must not be used.

Second, final § 1910.27(b)(1)(i) requires, before any rope descent system is used, that the building owner inform the employer in writing that the building owner has identified, tested, certified, and maintained each anchorage so it is capable of supporting at least 5,000 pounds (268 kg), in any direction for each employee attached. The information must be based on an annual inspection by a qualified person and certification of each anchorage by a qualified person, as necessary, and at least every 10 years. The information will assure employers and workers that the building owner has inspected, tested and certified the anchorage, which the employer may not own or have any control over, as safe to use. A related provision, final § 1910.27(b)(1)(ii), requires that the employer ensure no employee uses any anchorage before the employer has obtained written information from the building owner indicating that each anchorage meets the requirements of § 1910.27(b)(1)(i). The employer must keep the information for the duration of the job. The information will assure employers and workers that the anchorages employers use, but may not own or have any control over, are safe to use.

Third, final § 1910.28(b)(1)(ii) specifies that when employers can demonstrate that it is not feasible or creates a greater hazard to use guardrail, safety net, or personal fall protection systems on residential roofs, they must develop and implement a written fall protection plan that meets the requirements of 29 CFR 1926.502(k) and training that meets the requirements of 29 CFR 1926.503(a) and (c). The information collection ensures that employers and workers will know what alternative measures will be used at a given worksite to provide an appropriate level of protection when conventional fall protection is not feasible.

These requirements are contained in the Information Collection Request (ICR) approved by OMB under control number 1218–0199, which OSHA included in the final rule published in the **Federal Register** (81 FR 82978–80). The collections of information in final subpart D are necessary to ensure workers are protected from death or injury from falls from elevated heights.

Final subpart I expands the existing collections of information contained in

the hazard assessment and verification requirements in 29 CFR 1910.132 to include assessments for workers who use personal fall protection systems (29 CFR 1910.140). These requirements are contained in the Information Collection Request (ICR) approved by OMB under control number 1218–0205, which OSHA included in the final rule published in the **Federal Register** (81 FR 82978–80).

Additional public comment on the information collections in the final rule is not necessary. The public already has had the opportunity to comment on the collections of information and OMB has approved them. This revision of § 1910.8 is a purely technical step to increase public awareness of OMB’s approval of the collections of information.

Authority and Signature

Dorothy Dougherty, Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor’s Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on June 28, 2017.

Dorothy Dougherty,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

For the reasons stated in the preamble, the Occupational Safety and Health Administration amends 29 CFR part 1910 as follows:

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Subpart A—[Amended]

- 1. Revise the authority citation for subpart A to read as follows:

Authority: 29 U.S.C. 653, 655, 657; Secretary of Labor’s Order Numbers 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31159), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912), as applicable.

Sections 1910.6, 1910.7, 1910.8 and 1910.9 also issued under 29 CFR 1911. Section 1910.7(f) also issued under 31 U.S.C. 9701; 29 U.S.C. 9a; 5 U.S.C. 553; Public Law 106–113 (113 Stat. 1501A–222); Public Law 11–8 and 111–317; and OMB Circular A–25 (dated July 8, 1993) (58 FR 38142, July 15, 1993).

- 2. Amend § 1910.8 by adding to the table, in the proper numerical sequence, the entries for “1910.27,” and “1910.28,” to read as follows:

§ 1910.8 OMB control numbers under the Paperwork Reduction Act.

* * * * *				
29 CFR citation			OMB control No.	
* * *	* * *	* * *	* * *	* * *
1910.27		1218–0199	
1910.28		1218–0199	
* * *	* * *	* * *	* * *	* * *

BILLING CODE 4510–26–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2017–0524]

Drawbridge Operation Regulation; Mill River, New Haven, CT

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Chapel Street Bridge across the Mill River, mile 0.4 at New Haven, Connecticut. This deviation is necessary to complete bridge deck replacement as well as various repairs. This deviation allows the bridge to open for the passage of vessels upon two hours of advance notice as well as a ten day closure of the draw to all vessel traffic.

DATES: This deviation is effective from 12:01 a.m. on July 10, 2017 through 11:59 p.m. on September 9, 2017.

ADDRESSES: The docket for this deviation, USCG–2017–0524, is available at <http://www.regulations.gov>. Type the docket number in the “SEARCH” box and click “SEARCH”. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email James M. Moore, Bridge Management Specialist, First District Bridge Branch, U.S. Coast Guard; telephone 212–514–4334, email james.m.moore2@uscg.mil.

SUPPLEMENTARY INFORMATION: The City of New Haven, the owner of the bridge, requested a temporary deviation from the normal operating schedule to facilitate rehabilitation of the bridge, specifically replacement of the bridge deck. The Chapel Street Bridge, across

the Mill River, mile 0.4 at New Haven, Connecticut offers mariners a vertical clearance of 7.9 feet at mean high water and 14 feet at mean low water in the closed position. The existing drawbridge operating regulations are listed at 33 CFR 117.213(d).

Under this temporary deviation the Chapel Street Bridge will operate as follows: From 12:01 a.m. July 10, 2017 until 11:59 p.m. July 26, 2017, the Chapel Street Bridge will open for the passage of vessels requiring an opening provided two hours of advance notice is furnished to the owner of the bridge; except that, from 7:30 a.m. to 8:30 a.m. and 4:45 p.m. to 5:45 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessel traffic. The bridge will remain closed to all vessels requiring an opening from 12:01 a.m. July 27, 2017 until 11:59 p.m. August 7, 2017 to facilitate the pouring/curing of new bridge deck material. From 12:01 a.m. August 8, 2017 until 11:59 p.m. September 9, 2017 the bridge will open for the passage of vessels requiring an opening provided two hours of advance notice is furnished to the owner of the bridge; except that from 7:30 a.m. to 8:30 a.m. and 4:45 p.m. to 5:45 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessel traffic.

The bridge routinely opens for commercial vessels. Nevertheless, outreach with mariners has indicated the requirement for two hours of advance notice will not impede routine waterway operations. Mariners also offered no objection to a ten day closure of the draw in order to complete the necessary deck replacement. The concrete pour and curing process can be accomplished in four days, but a ten day closure period has been requested in order to take inclement weather into account. The bridge will resume operations as soon as the curing process has been completed.

Vessels that can pass under the bridge without an opening may do so at all times. The bridge will be not able to open for emergencies. There is no alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation

from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 30, 2017.

C.J. Bisignano,
*Supervisory Bridge Management Specialist,
First Coast Guard District.*

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2017-0231]

Drawbridge Operation Regulation; Hutchinson River, New York, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from drawbridge regulation; modification.

SUMMARY: The Coast Guard has modified a temporary deviation from the operating schedule that governs the Hutchinson River Parkway Bridge across the Hutchinson River, mile 0.9 at New York, New York. This deviation is necessary to complete application of protective coating on the bridge as well as maintenance of operating machinery. This modified deviation allows the bridge to remain in the closed-to-navigation position for periods of up to two weeks over the course of the summer months in order to expedite work efforts.

DATES: This deviation is effective without actual notice from July 6, 2017 through 12:01 a.m. on September 29, 2017. For the purposes of enforcement, actual notice will be used from 12:01 a.m. on June 30, 2017 until July 6, 2017.

ADDRESSES: The docket for this deviation, USCG-2017-0231 is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this modified temporary deviation, call or email James M. Moore, Bridge Management Specialist, First District Bridge Branch, U.S. Coast Guard; telephone 212-514-4334, email james.m.moore2@uscg.mil.

SUPPLEMENTARY INFORMATION: The New York City Department of Transportation, the owner of the bridge, requested a temporary deviation from the normal operating schedule to facilitate application of protective coating to the bridge as well as maintenance of

operating machinery. The Hutchinson River Parkway Bridge, across the Hutchinson River, mile 0.9 at New York, New York has a vertical clearance of 30 feet at mean high water and 38 feet at mean low water in the closed position. The existing drawbridge operating regulations are listed at 33 CFR 117.793(b).

On May 1, 2017, the Coast Guard published a temporary deviation entitled "Drawbridge Operation Regulation; Hutchinson River, New York, NY" in the **Federal Register** (82 FR 20257). Under that temporary deviation, between April 3, 2017 and September 29, 2017, the draw of the Hutchinson River Parkway Bridge would remain closed to navigation for a period not to exceed 7 days; the draw would then open for vessels in accordance with established operating regulations for a period not to exceed another 7 days, after which the cycle would repeat.

Due to project delays prompted by inclement weather and bridge equipment failure, the New York City Department of Transportation has requested that between June 9, 2017 and August 31, 2017 the draw of the Hutchinson River Parkway Bridge remain closed to navigation for a period not to exceed 14 days; the draw will then open for vessels in accordance with established operating regulations for a period not to exceed 7 days, after which the cycle will repeat. Between September 1, 2017 and September 29, 2017, the draw will remain closed to navigation for a period not to exceed 7 days; the draw will then open for vessels in accordance with established operation regulations for another 7 days, after which the cycle will repeat.

Vessels that can pass under the bridge without an opening may do so at all times. The bridge will not be able to open for emergencies. There is no alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transit to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
