

that final withdrawal payment cannot yet be calculated, the FCC imposes on the bidder responsible for the withdrawn bid an interim bid withdrawal payment, which will be applied toward any final bid withdrawal payment that is ultimately assessed.

41. The amount of the interim bid withdrawal payment may range from three percent to twenty percent of the withdrawn bid amount, with the percentage generally being higher where there is greater risk of bid withdrawals being used for anti-competitive purposes, such as in Auction 84 when there is little need for bidders to aggregate permits. In light of these considerations, the Bureaus propose to use the maximum interim bid withdrawal payment percentage allowed by 47 CFR 1.2104(g)(1) in the event bid withdrawals are allowed. The Bureaus request comment on using twenty percent for calculating an interim bid withdrawal payment amount in Auction 84. Commenters advocating the use of bid withdrawals should also address the percentage of the interim bid withdrawal payment.

42. *Additional Default Payment Percentage.* Any winning bidder that defaults or is disqualified after the close of an auction (i.e., fails to remit the required down payment within the prescribed period of time, fails to submit a timely long-form application, fails to make full and timely final payment, or is otherwise disqualified) is liable for a default payment under 47 CFR 1.2104(g)(2). This payment consists of a deficiency payment, equal to the difference between the amount of the Auction 84 bidder's winning bid and the amount of the winning bid the next time a construction permit covering the same spectrum is won in an auction, plus an additional payment equal to a percentage of the defaulter's bid or of the subsequent winning bid, whichever is less.

43. The Commission's rules provide that, in advance of each auction, it will establish a percentage between three percent and twenty percent of the applicable bid to be assessed as an additional default payment. As the Commission has indicated, the level of this additional payment in each auction will be based on the nature of the service and the construction permits being offered.

44. For Auction 84, the Bureaus propose to establish an additional default payment of twenty percent. Defaults weaken the integrity of the auction process and may impede the deployment of service to the public, and an additional twenty percent default payment will be more effective in

detering defaults than the three percent used in some earlier auctions. In light of these considerations, the Bureaus propose for Auction 84 an additional default payment of twenty percent of the relevant bid. Moreover, a twenty percent additional default payment amount is consistent with the percentage used in recent auctions of FM permits. The Bureaus seek comment on this proposal.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-7570 or send comments to Leroy Richardson, 1600

Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Data Calls for the Laboratory Response Network (0920-0881, Expiration 03/31/2014)—Extension-National Center for Emerging and Zoonotic Infectious Diseases (NCEZID, Centers for Disease Control and Prevention (CDC).)

Background and Brief Description

The Laboratory Response Network (LRN) was established by the Department of Health and Human

Services, Centers for Disease Control and Prevention (CDC) in accordance with Presidential Decision Directive 39, which outlined national anti-terrorism policies and assigned specific missions to Federal departments and agencies. The LRN's mission is to maintain an integrated national and international network of laboratories that can respond to acts of biological, chemical, or radiological terrorism and other public health emergencies. Federal, state and local public health laboratories voluntarily join the LRN.

The LRN Program Office maintains a database of information for each member laboratory that includes contact information as well as staff and equipment inventories. However, semiannually or during emergency response the LRN Program Office may conduct a Special Data Call to obtain additional information from LRN Member Laboratories in regards to biological or chemical terrorism preparedness. Special Data Calls may be conducted via queries that are distributed by broadcast emails or by survey tools (i.e. Survey Monkey). This is a request for an extension to this generic clearance. The only cost to respondents is their time to respond to the data call.

ESTIMATED ANNUALIZED BURDEN HOURS

Birth Defects Study To Evaluate Pregnancy exposureS (BD-STEPS) (formerly titled The National Birth Defects Prevention Study (NBDPS)), (OMB # 0920-0010, Expiration 04/30/2015)—Revision—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC has been monitoring the occurrence of serious birth defects and genetic diseases in Atlanta since 1967 through the Metropolitan Atlanta Congenital Defects Program (MACDP). The MACDP is a population-based surveillance system for birth defects currently covering three counties in Metropolitan Atlanta.

Since 1997, CDC has funded case-control studies of major birth defects that utilize existing birth defect surveillance registries (including MACDP) to identify cases and study birth defects causes in participating states/municipalities across the United States.

BD-STEPS is a case-control study that is similar to the previous CDC-funded birth defects case-control study, NBDPS, which stopped interviewing participants in 2013. As with NBDPS,
