j. *Deadline for filing comments and or motions:* August 11, 2003.

k. *Description of Amendment:* The licensee proposes the following design changes: (1) Installing 105 small turbines and generators, instead of the licensed three large turbines and generators, resulting in a reduction in the authorized capacity from 105 MW to 68.7 MW, (2) placing seven transformers and switchgears, and (3) constructing a 2-mile-long transmission line, instead of the licensed 5.1-mile-long route. The change in project design is to install 105 smaller units that would be fitted in seven modules, each located in a gate bay of the existing dam. This installation eliminates construction of an intake and tailrace, in effect, avoiding dredging, excavation, and spoil disposal. The proposed transmission line alignment will be along an existing transmission line to the point of interconnection with an existing line of Kentucky Utilities. k. The existing 120-foot-high, 2,100-foot-long Ritschard dam impounds the Wolford Mountain reservoir, which has a normal surface area of 1,550 acres and a storage volume of 65,985 acre-feet. The proposed powerhouse would be located at the toe of the dam next to the existing control house/terminal structure. The powerhouse would contain a single turbine and generator with a rated capacity of about 870 kilowatts. The average annual power generation would be 3,700 kilowatt-hours.

l. A copy of the request to use alternative procedures is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. m. The River District has demonstrated that it has made an effort to contact all federal and state resources agencies, non-governmental organizations (NGO), and others affected by the project. The River District has also demonstrated that a consensus exists that the use of alternative procedures is appropriate in this case. The River District has submitted a communications protocol that is supported by the stakeholders.

The purpose of this notice is to invite any additional comments on the River District's request to use the alternative procedures, pursuant to Section 4.34(i) of the Commission's regulations. Additional notices seeking comments on the specific project proposal, interventions and protests, and mandatory terms and conditions will be issued at a later date. The River District will complete and file a preliminary Environmental Assessment, in lieu of Exhibit E of the exemption application. This differs from the traditional process, in which an applicant consults with agencies, Indian tribes, NGOs, and other parties during preparation of the exemption application and before filing the application, but the Commission staff performs the environmental review after the application is filed. The alternative procedures are intended to simplify and expedite the exemption process by combining the pre-filing consultation and environmental review processes into a single process, to facilitate greater participation, and to improve communication and cooperation among the participants.

The River District intends to file 6-month progress reports during the alternative procedures process that leads to the filing of an exemption application by February 2005.

Secretary.
