

(3) *Scientifically based research* has the meaning given the term in 20 U.S.C. 7801(37): Research that involves the application of rigorous, systematic, and objective procedures to obtain reliable and valid knowledge relevant to education activities and programs. It includes research that—

(a) employs systematic, empirical methods that draw on observation or experiment;

(b) involves rigorous data analyses that are adequate to test the stated hypotheses and justify the general conclusions drawn;

(c) relies on measurements or observational methods that provide reliable and valid data across evaluators and observers, across multiple measurements and observations, and across studies by the same or different investigators;

(d) utilizes experimental or quasi-experimental designs in which individual entities, programs, or activities are assigned to different conditions and with appropriate controls to evaluate the effects of the condition of interest, with a preference for random-assignment experiments, or other designs to the extent that those designs contain within-condition or across-condition controls;

(e) ensures that experimental studies are presented in sufficient detail and clarity to allow for replication or, at a minimum, offer the opportunity to build systematically on their findings; and

(f) has been accepted by a peer-reviewed journal or approved by a panel of independent experts through a comparably rigorous, objective, and scientific review.

(4) *Students with intellectual disabilities* means—

(a) individuals between the ages of 16 and 24 whose intellectual functioning levels require significant changes in instructional methods and modifications to the curriculum in order to participate in postsecondary educational activities;

(b) individuals who have significant limitations in adaptive skill areas as expressed in conceptual, social, and practical adaptive skills; and

(c) individuals whose disabilities originated before the age of 18.

Executive Order 12866

This notice of proposed priority and definitions has been reviewed in accordance with Executive Order 12866. Under the terms of the order, we have assessed the potential costs and benefits of this regulatory action.

The potential costs associated with this notice of proposed priority and definitions are those resulting from

statutory requirements and those we have determined as necessary for administering this program effectively and efficiently.

In assessing the potential costs and benefits—both quantitative and qualitative—of this notice of proposed priority and definitions, we have determined that the benefits of the proposed priority and definitions justify the costs.

Summary of potential costs and benefits

The benefits of the DRRP programs have been well established over the years in that other DRRP projects have been completed successfully. The priority and definitions proposed in this notice will generate new knowledge through research, development, dissemination, utilization, and technical assistance.

Another benefit of the proposed priority and definitions is that establishing a new DRRP will support the President's NFI and improve the lives of individuals with disabilities. The new DRRP will generate, disseminate, and promote the use of new information that will improve the options for individuals with intellectual disabilities to achieve improved education, employment, and independent living outcomes.
