

performance reports will contain information on the following:

- A comparison of actual accomplishments to the objectives established for the period;
- Reasons for slippage if established objectives were not met;
- Additional pertinent information when appropriate;
- A comparison of actual and projected grant expenditures; and,
- The amount of Federal cash on hand at the beginning and end of the reporting period.

The final performance report must contain a summary of activities for the entire grant period. All required deliverables should be submitted with the final performance report. The final SF 269A, "Financial Status Report," must be submitted to OEA within 90 days after the end date of the grant. Any grant funds actually advanced and not needed for grant purposes shall be returned immediately to OEA.

OEA will provide a schedule for reporting periods and report due dates in the grant agreement.

BILLING CODE 3710-08-M

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Availability of the Draft Supplemental Environmental Impact Statement for the Rueter-Hess Reservoir Expansion Project, Parker, CO

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: The U.S. Army Corps of Engineers (Corps) Omaha District has prepared a Draft Supplemental Environmental Impact Statement (SEIS) to analyze the direct, indirect and cumulative effects of enlarging the currently permitted Rueter-Hess Reservoir in Parker, CO. The current project was authorized in February 2004 with Department of the Army Permit No. 199980472 (Section 404 Permit). The basic purpose of the Proposed Action would allow the reservoir to serve as a regional water management facility for multiple water providers in northern Douglas County; enable them to meet peak demands; greatly enhance water management in the region; and help extend the yield of the Denver Basin aquifers, a non-renewable water source and the primary source of water for the South Metro area. Expansion of the reservoir would result in direct impacts to an additional 0.21 acres of wetlands and 4 miles of intermittent stream channel (in addition to the 6.7 acres of wetlands and 5 miles of other waters of the U.S. permitted as part of the 16,200-acre-foot [AF] reservoir). This action requires authorization from the Corps under Section 404 of the

Clean Water Act. The Permittee and Applicant is the Parker Water and Sanitation District (PWSD).

The Draft SEIS was prepared in accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, and the Corps' regulations for NEPA implementation (33 Code of Federal Regulations [CFR] Parts 230 and 325, Appendices B and C). The Corps, Omaha District, Regulatory Branch is the lead federal agency responsible for the Draft SEIS and information contained in the SEIS serves as the basis for a decision regarding issuance of a Section 404 Permit modification. It also provides information for local and state agencies having jurisdictional responsibility for affected resources.

DATES: Written comments on the Draft SEIS will be accepted on or before August 27, 2007. Oral and/or written comments may also be presented at the Public Hearings to be held at 7 p.m. on Tuesday, August 21, 2007 at the Douglas County Office Building (Philip S. Miller Bldg.), Hearing Room (100 Third Street), Castle Rock, CO and on Wednesday, August 22, 2007 at the North Water Reclamation Plant (18100 East Woodman Drive), Parker, CO.

ADDRESSES: Send written comments regarding the Proposed Action and Draft SEIS to Rodney Schwartz, Senior Project Manager, U.S. Army Corps of Engineers, Omaha District—Regulatory Branch, 12565 West Center Road, Omaha, NE 68144-3869 or via e-mail: rodney.j.schwartz@usace.army.mil. Requests to be placed on or removed from the mailing list should also be sent to this address.

FOR FURTHER INFORMATION CONTACT: Rodney Schwartz, Senior Project Manager, U.S. Army Corps of Engineers at 402-221-4143; Fax 402-221-4939.

SUPPLEMENTARY INFORMATION: The purpose of the Draft SEIS is to provide decision-makers and the public with information pertaining to the Proposed Action and alternatives, and to disclose environmental impacts and identify mitigation measures to reduce impacts. PWSD proposes to enlarge the Rueter-Hess Reservoir from the currently permitted design of 16,200 AF by 55,800 AF for a total storage capacity of approximately 72,000 AF. This is considered the site's maximum storage capacity based on the site's topography. The proposed expanded reservoir pool would inundate approximately 1,140 acres (an additional 672 acres). PWSD would maintain a 5,000-AF emergency reserve pool in the reservoir (elevation 6,110 feet) to be used as needed to provide a reliable water supply for its
