[Project No. 13525-000]

**Green Hydropower Inc.; Notice of
Preliminary Permit Application
Accepted for Filing and Soliciting
Comments, Motions To Intervene, and
Competing Applications**

October 30, 2009.

On June 23, 2009, and supplemented on October 15, 2009, Green Hydropower Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA)¹ to study the feasibility of the proposed Green Hydropower Chief Joseph Project. The project would be located in Douglas and Okanogan Counties, Washington. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Green Hydropower Chief Joseph Project is an in-river development that would be located approximately 1 mile downstream of the U.S. Army Corps of Engineers' Chief Joseph Dam on the Columbia River. The project would consist of: (1) Multiple 10-foot-diameter to 40-foot diameter sea anchors (pieces of high-strength synthetic material that inflate to roughly the shape of a parachute in the presence of an underwater current); (2) up to 1.25-mile long synthetic rope; (3) an electric driven traction winch or an electric-driven capstan; (4) a 1 to 2-megawatt generator attached to the winch or capstan; (5) a floating vessel, such as a boat; (6) a new approximately 480-volt, 1,500-foot-long transmission line; and (7) appurtenant facilities. The sea anchors would be attached to a rope that is connected to the winch or capstan. The winch or capstan would be mounted on shore or on a floating vessel. The sea anchors would be pulled downstream by the existing current, pulling the rope through a winch or capstan, which will turn the generator. The project would have an estimated annual generation of between 8,750 megawatt-hours (MWh) and 17,500 MWh per year.
