

Modifications and Preliminary Prescriptions for Milford, Veazie, Stillwater, and Orono (FWS Modified Prescriptions). The FWS Modified Prescriptions contain fish passage provisions to be implemented initially and when the Designated Projects are acquired by the Trust.

The Parties included the MPA, the Option Agreement, and the PIN Agreement with the Comprehensive Settlement filing for informational purposes only and are not requesting that the Commission approve any of these three agreements. Rather, they request that the Commission approve the applications/requests that they have submitted to implement the initial phase of the Comprehensive Settlement (Phase 1 Requests): The Joint Request, the license amendment applications for Veazie, Milford, Stillwater, Medway, and West Enfield, the application for new license for Orono, and the FWS Modified Prescriptions. The MPA provides that, if the Commission approves all of the Phase 1 Requests without material change, the requests for rehearing of the Commission's April 20, 1998 orders in the Basin Mills, *et al.* proceedings and certain submittals made by DOI in the Milford relicensing proceeding will be withdrawn.

[Project No. 1951-114]

Georgia Power Company; Notice of Availability of Environmental Assessment

June 29, 2004.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects staff (staff) reviewed the request for a municipal water withdrawal from the Sinclair Project, located on the Oconee River in Baldwin, Putnam, and Hancock Counties, Georgia, and prepared an environmental assessment (EA) for the proposed water withdrawal. In this EA, staff analyze the potential environmental effects of the proposed water withdrawal of six million gallons per day as a monthly average from the project reservoir for municipal water supply, and conclude that the proposed water withdrawal would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426 or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
