Title: NSPS for Surface Coating of Large Appliances.

ICR Numbers: EPA ICR Number 0659.11, OMB Control Number 2060-0108.

ICR Status: This ICR is scheduled to expire on October 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if

applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Owners or operators of large appliance surface coating operations are required to report startup, initial performance test, and retest information. Facilities will also report on a regular basis emission exceedances, changes to equipment, and other requirements.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 53 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Large appliance surface coating facilities.

Estimated Number of Respondents: 72.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 7,659.

Estimated Total Annual Cost: \$657,087, which includes \$648,687 in labor costs, no capital/startup costs, and \$8,400 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. There is a minor change to the cost figures, since the previous ICR rounded to the nearest \$1,000; this ICR presents cost figures which differ by less than \$500 from the previous ICR due to using exact figures instead of rounding.

Dated: October 20, 2009.
