Changes in Estimates: There is a net decrease of 286,261 (1.3%) hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is primarily due to a reduction in the estimate of the number of respondents. This net reduction included an increase in burden related to: The addition of the burden associated with the airport deicing category; changes in the burden associated with agency actions related to changes in the VGP; and addition of burden associated with the issuance of the small vessels general permit (sVGP).

Abstract: Section 126(f) of the Superfund Amendments and Reauthorization Act of 1986 (SARA) requires EPA to set worker protection standards for State and local employees engaged in hazardous waste operations and emergency response in the 27 States that do not have Occupational Safety and Health Administration approved State plans. The EPA coverage, as cited in 40 CFR 311, required to be identical to the OSHA standards, extends to three categories of employees: Those engaged in clean-ups at uncontrolled hazardous waste sites, including corrective actions at Treatment, Storage and Disposal (TSD) facilities regulated under the Resource Conservation and Recovery Act (RCRA); employees working on routine hazardous waste operations at RCRA TSD facilities; and employees involved in emergency response operations without regard to location. This ICR renews existing mandatory record keeping collection of ongoing activities including monitoring of any potential employee exposure at uncontrolled hazardous waste sites, maintaining

records of employee training, refresher training, medical exams and reviewing emergency response plans.

Form Numbers: None.

Respondents/Affected Entities:

Entities potentially affected by this action are those State and local employees engaged in hazardous waste operations and emergency response in the 27 States that do not have Occupational Health & Safety Administration (OSHA) approved State plans.

Respondent's Obligation To Respond: 40 CFR part 311 has no reporting requirements. There are record keeping requirements by inference in Section (e) and by statute in Section (f)[8] of OSHA's 29 CFR 1910.120.

Estimated Total Number of

Respondents: 24,000.

Frequency of Response: Annually recordkeeping. No response required to Agency.

Estimated Total Annual Burden

Hours: 255,427 hours.

Estimated Total Annual Costs: \$3,528,888, which is entirely for labor. There are no capital investment or maintenance and operational costs.

Changes in Estimates: These burden estimates reflect what is currently approved by OMB, without change. EPA will provide revised burden estimates when the second comment period for this ICR is opened. However, as the universe and regulations have not changed, EPA does not anticipate any substantive changes to the burden figures.
