## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

#### Notice of Application Accepted for Filing and Soliciting Motions To Intervene, Protests, Comments, Recommendations, and Terms and Conditions

October 2, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. *Type of Application:* Conduit Exemption.
- b. *Project No.:* 12119-000.
- c. *Date filed:* September 6, 2001.
- d. *Applicant:* PowerWheel Associates.
- e. *Name of Project:* PowerWheel Demonstration Project.
- f. *Location:* In Kern County, California. The project would be located on Semitropic Water Storage District's (SWSD) main intake canal at Station 70+50. The man-made canal's proximate source of water where the project will be located is the California Aqueduct at Station 2157+22. The project would not occupy federal or tribal lands.
- g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).
- h. *Applicant Contact:* Mr. Kenneth R. Broome, Managing Partner, PowerWheel Associates, 100 Rocky Creek Road, Woodside, CA 94062, (650) 529-1810.
- i. *FERC Contact:* Regina Saizan, (202) 219-2673.
- j. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see the following paragraphs about filing responsive documents.
- k. *Deadline for filing motions to intervene, protests and comments:* (November 3, 2001).

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions

on the Commission's web site under the “e-Filing” link.

Please include the Project Number (12119-000) on any comments, protests, or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing a document with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Project:* The project would consist of a waterwheel, 7 feet in external diameter, 3½ feet in internal diameter and 14½ feet long, to be operated in a “run-of-conduit” mode with whatever flow is available and required to satisfy SWSD customer needs. It will have one 75-kW generating unit installed at the sloping drop structure located at Station 70+50. The average annual generation would be 328,500 kWh.

m. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 208-1371. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at <http://www.ferc.gov> using the “RIMS” link, select “Docket#” and follow the instructions (call 202-208-2222 for assistance). A copy is also available for inspection and reproduction at the address in item h above.

n. *Development Application—*Any qualified applicant desiring to file a competing application must submit to the Commission, on or before the specified deadline date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified deadline date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

o. *Notice of Intent—*A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit

application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

p. *Protests of Motions to Intervene—*Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

q. *Filing and Service of Responsive Documents—*The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

r. *Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.*

s. All filings must (1) bear in all capital letters the title “PROTEST”, “MOTION TO INTERVENE”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “COMMENTS”, “REPLY COMMENTS”, “RECOMMENDATIONS”, “TERMS AND CONDITIONS”, or “PRESCRIPTIONS”; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. A copy of all other filings in reference to this application must be

accompanied by proof of service on all persons listed in the Service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

David P. Boergers,

Secretary.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-7076-3]

### Agency Information Collection Activities: Proposed Collection; Comment Request; Emission Compliance and Fuel Economy Information; Motorcycles and Light Duty

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Emission Compliance and Fuel Economy Information; Motorcycles and Light Duty. This ICR was formerly titled "Emission Certification and Fuel Economy Compliance; Motorcycles, Light Duty Vehicles and Light Duty Trucks"; EPA ICR 0783.37, OMB 2060-0104, it expires December 31, 2001. EPA is also planning on including provisions currently contained in other ICR's dealing with assembly line testing, recalls and NLEV standards, OMB numbers 2060-0064, 2060-0094, 2060-0124, 2060-0345 and 2060-0425. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

**DATES:** Comments must be submitted on or before December 10, 2001.

**ADDRESSES:** Interested persons may obtain a copy of the various ICRs without charge from: United States Environmental Protection Agency, Certification and Compliance Division, ATTN: Richard W. Nash, 2000 Traverwood Dr., Ann Arbor, MI 48105.

**FOR FURTHER INFORMATION CONTACT:** Richard W Nash, 2000 Traverwood Dr., Ann Arbor, MI 48105, (734) 214-4412, E-mail: [nash.dick@epa.gov](mailto:nash.dick@epa.gov).

**SUPPLEMENTARY INFORMATION:**

**Affected entities:** Entities potentially affected by this action are passenger car, light truck and motorcycle manufacturers and importers.

**Title:** Emission Compliance and Fuel Economy Information; Motorcycles and Light Duty. This collection was formerly titled "Emission Certification and Fuel Economy Compliance; Motorcycles, Light Duty Vehicles and Light Duty Trucks"; EPA ICR 0783.37, OMB 2060-0104, expiring December 31, 2001.

**Abstract:** Under the Clean Air Act (42 U.S.C. 7525), manufacturers and importers of passenger cars, light trucks and motorcycles must have a certificate of conformity issued by EPA covering any vehicle they intend to offer for sale. In addition, car and truck manufacturers (and importers) must also submit information and reports required by the Energy Conservation and Policy Act (15 U.S.C. 2000 *et seq.*). EPA reviews vehicle information and test data to verify that the vehicle conforms to appropriate requirements and to verify that the proper testing has been performed. Subsequent audit and enforcement actions may be taken based, in part, on the initial information submitted. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

**ICR Consolidation:** In addition to renewing the emission certification portion of the ICR, EPA is proposing to consolidate several related and similar ICRs dealing with specific aspects of the emission compliance process. Although EPA's various compliance activities have always relied heavily on information collected during emission certification; a limited amount of additional information is sometimes also required. Consequently, it is logical to consolidate these other collections. Further, other information collections are inherently related to the emission certification process. The ICRs proposed to be consolidated are discussed in more detail in the paragraph below.

Of necessity, test vehicles used to substantiate compliance with emission standards cannot be covered by a certificate until one has been issued. EPA has established procedures for "exclusions and exemptions" in 40 CFR part 85, subpart R; the information collection is approved under OMB 2060-0124, Motor Vehicle Exclusion Determination, EPA ICR 0012.11. EPA proposes to consolidate this collection with the certification ICR which it supports. EPA adopted voluntary

emission standards providing a compatible system to those standards established by California and certain northeastern states; National Low Emitting Vehicle Program, NLEV. The NLEV information requirements were approved by OMB 2060-0345, EPA ICR 1761.02. However, these voluntary standards have, in effect, supplanted the regular standards and associated information collection previously approved by OMB. Incorporating these NLEV reporting burdens with the other certification provisions they have supplanted is both logical and will eliminate the very slight overstatement of burden resulting from having two duplicate approved processes when only one is used. EPA's emission certification program is the starting point for all subsequent compliance activities. Information collected during certification is used in planning those subsequent activities and answering questions that may arise. The formal title has been Motor Vehicle Emission Certification and Fuel Economy Compliance; it was approved by OMB under 2060-0104, EPA ICR 783.39. Information describing the vehicles which will be produced and test results substantiating that they will comply with applicable standards is reviewed by EPA before issuing a "Certificate of Conformity." Assembly line testing, known as Selective Enforcement Audit, is chronologically the next compliance mechanism; it assures that the vehicles actually produced do in fact comply with applicable standards and regulations. Selective Enforcement Audit was formally approved by OMB under 2060-0064, that authority has since expired. Although EPA has not conducted an assembly line test recently, the Agency wishes to retain authority to do so; albeit at a very low rate, a fraction of one audit per year. The Agency believes that assembly line testing may be useful in some limited circumstances in the future and, therefore, proposes to include it in the consolidated ICR. EPA's other major compliance technique is vehicle recall which is comprised of two components. Vehicle manufacturers are required to submit certain reports; Emission Defect Information and Voluntary Emission Recall Reports for On-Highway, Light-duty Vehicles, OMB approval 2060-0425, EPA ICR 1916.01. In addition, when EPA conducts testing on in-use vehicles, manufacturers are asked to verify the construction and testing conditions; Verification of Test Parameters and Parts Lists for Light-Duty Vehicles and Light-Duty Trucks. This information collection is
