SUPPLEMENTARY INFORMATION: On April 21, 2023, President Biden signed Executive Order (E.O.) 14096 to revitalize our nation’s commitment to environmental justice for all.¹ As set forth in section 2 of E.O. 14096, “Environmental justice” means the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, Tribal affiliation, or disability, in agency decision-making and other Federal activities that affect human health and the environment so that people: (i) are fully protected from disproportionate and adverse human health and environmental effects (including risks) and hazards, including

those related to climate change, the cumulative impacts of environmental and other burdens, and the legacy of racism or other structural or systemic barriers; and (ii) have equitable access to a healthy, sustainable, and resilient environment in which to live, play, work, learn, grow, worship, and engage in cultural and subsistence practices.

To address the need for a coordinated Federal strategy to identify and address gaps in science, data, and research related to environmental justice, Section 5 of E.O. 14096 directs the Director of the Office of Science and Technology Policy (OSTP) to establish an Environmental Justice Subcommittee of the National Science and Technology Council (Environmental Justice Subcommittee). As directed by the E.O., the Environmental Justice Subcommittee is preparing an Environmental Justice Science, Data, and Research Plan (Research Plan) to:

(A) analyze any gaps and inadequacies in data collection and scientific research related to environmental justice, with a focus on gaps and inadequacies that may affect agencies’ ability to advance environmental justice, including through the Environmental Justice Strategic Plans required under section 4 of E.O. 14096;

(B) identify opportunities for agencies to coordinate with the research efforts of State, Tribal, territorial, and local governments; academic institutions; communities; the private sector; the non-profit sector; and other relevant actors to accelerate the development of data, research, and techniques—including consideration of Indigenous Knowledge—to address gaps and inadequacies in data collection and scientific research that may affect agencies’ ability to advance environmental justice;

(C) provide recommendations to agencies on the development and use of science, data, and research to support environmental justice policy and the agency responsibilities outlined in section 3 of the E.O.;

(D) provide recommendations to the Chair of the White House Council on Environmental Quality (CEQ) on data sources to include in the Climate and Economic Justice Screening Tool established pursuant to section 222(a) of *Executive Order 14008*;

(E) provide recommendations to agencies on ethical standards, privacy protections, and other requirements for the development and use of science, data, and research addressed in the Research Plan, including recommendations with respect to
