SUPPLEMENTARY INFORMATION: The Suisun Marsh is the largest contiguous brackish water wetland in California. It is an important wetland on the Pacific Flyway, providing food and habitat for migratory birds. This intricate mosaic of tidal wetlands, diked seasonal wetlands, sloughs, and upland grasslands comprises over 10 percent of the

remaining wetlands in California and is an important part of the San Francisco Bay-Delta Estuary. The Suisun Marsh provides habitats for many species of plants, fish, and wildlife, in addition to wintering and nesting habitat for waterfowl on the Pacific Flyway. The Suisun Marsh is located within the Bay-Delta estuary. As a result, its water quality affects, and is affected by, California's two largest water supply systems, the Federal Central Valley Project and the State Water Project, and other upstream diversions. These factors have made the Suisun Marsh one of the most highly regulated wildlife habitat areas in California and, as such, the Marsh occupies a prominent place in the Bay-Delta Program, a joint State-Federal planning group formed to develop and implement a long-term comprehensive plan that will restore ecological health and improve water management for beneficial uses of the Bay-Delta.

California Bay-Delta Authority and member agency managers with primary responsibility for actions in Suisun Marsh formed a Charter Group to develop an implementation plan for Suisun Marsh that would protect and enhance Pacific Flyway and existing wildlife values, endangered species, and water quality. Because the Suisun Marsh includes private lands, the Suisun Resource Conservation District (SRCD) also serves on the Charter Group to represent the interests of private landowners. Other Charter Group members include DFG, FWS, Reclamation, and the California Department of Water Resources (DWR). Other Bay-Delta Program participating agencies include the National Oceanic and Atmospheric Administration (NOAA) Fisheries and the U.S. Army Corps of Engineers.

The proposed Suisun Marsh Plan would be developed to balance the goals and objectives of the Bay-Delta Program, Suisun Marsh Preservation Agreement, and other management and restoration programs within the Suisun Marsh in a manner that is responsive to the concerns of all stakeholders and is based upon voluntary participation by private landowners. The proposed Suisun Marsh Plan would provide for simultaneous protection and enhancement of: (1) Pacific Flyway and existing wildlife values in managed wetlands, (2) endangered species recovery, and (3) water quality.

The PEIS/EIR would address the design, implementation, and maintenance of specific actions needed to achieve the Suisun Marsh Plan. The Suisun Marsh is that portion of San Francisco Bay downstream from the
